LOVE
CERAMIC TILES

O LOCAL MAIS SEGURO DO MUNDO

Ação antibacteriana ativa contínua

- Escolhemos a Microban®, líder global em tecnologia antibacteriana, para tornar os produtos cerâmicos ainda mais seguros.
- Há mais bactérias numa mão do que pessoas na Terra.
- O crescimento bacteriano pode duplicar de número a cada 20 minutos em superfícies não protegidas.

Os pavimentos de áreas com elevados níveis de tráfego pedestre, tais como escolas, escritórios, hospitais e edifícios públicos são locais ideais para o crescimento microbiano e bacteriano, mas as nossas casas, apesar da limpeza diária, também podem ser contaminadas por germes e bactérias vindas do exterior.

Atualmente, graças ao trabalho contínuo no Panariagroup Research Centre e a um acordo prestigiado com a Microban®, líder global em tecnologia antibacteriana, temos o orgulho de anunciar a linha PROTECT®. Produzidos com a tecnologia Microban®, os pavimentos e revestimentos da Love Tiles estão protegidos por uma barreira antibacteriana inovadora que elimina até 99,9% das bactérias na superfície e garante uma proteção duradoura contra o desgaste, condições climáticas e limpezas repetidas em qualquer ambiente.

A tecnologia de prata Microban foi registada junto da Diretiva de Produtos Biocidas (BPD, Biocidal Product Directive), sob os tipos de produto adequados conforme requerido pela Diretiva de Produtos Biocidas da UE, 98/8/CE.

Além disso, a tecnologia Microban® está ativa 24 horas por dia, garantindo proteção contínua dia e noite, mantendo os mosaicos mais higiénicos entre limpezas.

L'ENDROIT LE PLUS SÛR AU MONDE

Action antibactérienne active en permanence

- Nous avons choisi Microban®, le leader mondial en technologie antibactérienne, pour rendre nos carrelages encore plus sûrs.
- Il y a plus de bactéries sur une main que d'habitants sur la terre
- Sur les surfaces non protégées, la prolifération des bactéries peut se multiplier par deux toutes les 20 minutes.

Les sols des zones à hauts niveaux de trafic des piétons, comme par exemple, les écoles, bureaux, hôpitaux et bâtiments publics, sont des endroits qui se prêtent à la prolifération microbienne et bactérienne, mais, malgré un nettoyage quotidien, nos foyers peuvent aussi être contaminés par des germes et des bactéries venant de l'extérieur.

À l'heure actuelle, grâce aux travaux continus du Panariagroup Research Centre, et à un contrat prestigieux avec Microban®, le leader mondial en technologie antibactérienne, nous sommes fiers d'annoncer la ligne PROTECT®. La gamme Love Tiles, produits en incorporant la technologie Microban®, sont protégés par un bouclier antibactérien innovateur qui élimine jusqu'à 99,9% des bactéries sur les surfaces et garantit une protection durable contre l'usure, les conditions climatiques et les nettoyages à répétition dans tous les lieux d'utilisation.

La technologie à base d'argent Microban est notifiée avec la Directive sur les produits biocides (Biocidal Products Directive, BPD) sous les types de produits appropriés tel que requis par la Directive européenne sur les produits biocides, 98/8/EC.

Par ailleurs, la technologie Microban® reste active 24 heures par jour, ce qui garantit une protection ininterrompue jour et nuit, maintenant les carrelages dans un état plus hygiénique entre les nettoyages.

САМОЕ БЕЗОПАСНОЕ МЕСТО В МИРЕ

Постоянное эффективное антибактериальное действие

- Чтобы сделать нашу плитку еще безопаснее, мы используем продукцию компании Microban® — мирового лидера в области антибактериальных технологий.
- На ладони одной руки больше бактерий, чем людей на всей планете.
- На незащищенных поверхностях количество бактерий может удваиваться каждые 20 минут.

Полы в местах с интенсивным пешеходным движением, например, в школах, больницах, административных и общественных зданиях, идеально подходят для размножения микробов и бактерий. Несмотря на ежедневную уборку, наши жилища также подвергаются нашествию микробов и бактерий извне.

Сегодня мы с гордостью сообщаем, что благодаря плодотворной деятельности Исследовательского центра Panariagroup и подписанию соглашения с мировым лидером в области антибактериальных технологий, компанией Microban®, мы запускаем новую линейку PROTECT®. Изготовленные по технологии Microban®, напольные и настенные покрытия Love Tiles защищены инновационным антибактериальным покрытием, которое устраняет до 99,9% бактерий на поверхности и обеспечивает длительную защиту от износа, погодных условий и регулярной уборки в любых условиях эксплуатации.

Технология на основе серебра Microban была зарегистрирована Директивой о биоцидных продуктах (BPD) для соответствующих типов продуктов, как того требует Директива ЕС по биоцидным продуктам, 98/8 / EC.

Кроме того, действуя 24 часа в сутки, технология Microban® гарантирует непрерывную защиту плитки днем и ночью, а также поддерживает гигиену в период между уборками.

PROTECT®

Antibacterial for Life.

THE SAFEST PLACE IN THE WORLD

Continuous active antibacterial action

- We have chosen Microban®, the global leader in antibacterial technology, to make our tiles even safer.
- There are more bacteria on one hand than people on the Earth.
- Bacterial growth can double in number every 20 minutes on unprotected surfaces.

Floors in areas with high levels of pedestrian traffic, such as schools, offices, hospitals and public buildings are ideal places for microbial and bacterial growth, but our homes, despite daily cleaning, can also be contaminated by germs and bacteria from outside.

Today, thanks to ongoing work at the Panariagroup Research Centre and a prestigious agreement with the global leader in antibacterial technology Microban®, we are proud to announce PROTECT® line. Love Tiles products, produced with Microban® technology, are protected by an innovative antibacterial shield that eliminates up to 99.9% of bacteria on surfaces and guarantees long-lasting protection against wear and tear, climatic conditions and repeated cleans in any usage environment.

Microban silver technology is notified with the Biocidal Products Directive (BPD) under the appropriate product types as required by the EU Biocidal Products Directive, 98/8/EC.

In addition, Microban® technology is active 24 hours a day, guaranteeing continuous protection day and night, keeping tiles more hygienic in between cleans.

DER SICHERSTE ORT DER WELT

Die aktive antibakterielle Aktion geht weiter

- Wir haben uns für Microban®, den Weltmarktführer in antibakterieller Technologie entschieden, um unsere Fliesen noch sicherer zu machen.
- In der Fläche einer Hand leben mehr Bakterien als Menschen auf der Erde.
- Bakterieller Wachstum kann sich auf ungeschützten Oberflächen alle 20 Minuten verdoppeln.

Fußböden in Bereichen mit hohem Fußgängeraufkommen wie Schulen, Büros, Krankenhäusern und öffentlichen Gebäuden sind ideale Orte für mikrobisches und bakterielles Wachstum, und sogar unsere Wohnungen können trotz täglicher Reinigung durch Erreger und Bakterien von außen verseucht sein.

Heute geben wir, dank der andauernden Forschungsarbeit des Panariagroup Research Centre und einem Übereinkommen mit Microban®, dem Weltmarktführer in antibakterieller Technologie unsere neue „PROTECT® -Reihe“ bekannt. Die anhand der Microban®-Technologie gefertigten Love Tiles - Fliesen durch eine innovative antibakterielle Barriere geschützt, die bis zu 99,9% der Bakterien an der Oberfläche eliminiert und einen dauerhaften Schutz gegen Abnutzung, Witterung und wiederholte Reinigung in jeglichem Einsatzumfeld bietet.

Die Microban Silbertechnologie wurde gemäß der Anforderungen der EU-Richtlinie für Biozid-Produkte (98/8/CE) unter dem Schutz der Richtlinie für Biozid-Produkte (BPD, Biocidal Product Directive) registriert.

Außerdem ist die Microban®-Technologie 24 Stunden am Tag aktiv und garantiert auf diese Weise Tag- und Nachtschutz, indem sie die Fliesen zwischen den Putzvorgängen hygienisch hält.

IL POSTO PIÙ SICURO AL MONDO

Azione antibatterica attiva continua

- Abbiamo scelto Microban®, leader mondiale nella tecnologia antibatterica, per rendere ancora più sicure le nostre piastrelle.
- Ci sono più batteri su una mano che abitanti sulla Terra.
- Sulle superfici non protette la crescita batterica può raddoppiare ogni 20 minuti.

I pavimenti di zone ad alto calpestio come scuole, uffici, ospedali e locali pubblici possono rappresentare luoghi ideali per la crescita di microbi e batteri, ma anche la nostra casa, nonostante la pulizia quotidiana, può essere contaminata da germi e batteri provenienti dall'esterno.

Oggi, grazie al costante lavoro del Centro Ricerche Panariagroup e ad un prestigioso accordo con Microban®, leader mondiale nella tecnologia antibatterica, siamo orgogliosi di annunciare la linea PROTECT®. I prodotti Love Tiles, realizzati con la tecnologia Microban®, sono protetti da un innovativo scudo antibatterico che elimina fino al 99,9% dei batteri dalla superficie e assicura una protezione duratura contro l'usura, gli agenti atmosferici e la pulizia ripetuta in qualsiasi ambiente di utilizzo.

La tecnologia Microban a base di argento è registrata ai sensi della direttiva sui biocidi (BPD, Biocidal Product Directive) nell'ambito dei tipi di prodotto appropriati, come richiesto dalla direttiva UE sui biocidi 98/8/CE.

Inoltre, la tecnologia Microban® rimane attiva 24 ore su 24, garantendo una protezione continua giorno e notte, mantenendo le piastrelle più pulite fra una pulizia e l'altra.

Sustainable Choice

Uma Escolha Sustentável

ESTE É O NOSSO MANIFESTO EM PROL DA NEUTRALIDADE CARBÓNICA.

A sustentabilidade não é um objetivo distante. É uma escolha diária que orienta tudo o que fazemos nas nossas marcas.

Embora a tecnologia ainda não permita ser 100% ecológico, optamos por agir agora. Estamos a transformar os nossos produtos e a alinhar a nossa indústria com a neutralidade carbónica, a biodiversidade e a sustentabilidade, redesenhando e repensando todos os produtos e serviços para os tornar verdadeiramente sustentáveis.

Cuidar do nosso planeta não é apenas o que fazemos – é quem nós somos.

Optamos por ser sustentáveis. Hoje. Amanhã. Sempre.

THIS IS OUR MANIFESTO TOWARDS CARBON NEUTRALITY.

Sustainability is not a distant goal. It's a daily choice that guides everything we do across our brands.

While technology has not yet made it possible to be 100% green, we choose to act now. We are transforming our products and aligning our industry with carbon neutrality, biodiversity and sustainability, redesigning and rethinking every product and service to make them truly sustainable.

Caring for our planet is not just what we do — it's who we are.

We choose to be sustainable. Today. Tomorrow. Always.

VOICI NOTRE MANIFESTE EN FAVEUR DE LA NEUTRALITÉ CARBONE.

La durabilité n'est pas un objectif lointain. C'est un choix quotidien qui guide toutes nos actions au sein de nos marques.

Même si la technologie ne permet pas encore d'être 100 % écologique, nous avons choisi d'agir dès maintenant. Nous transformons nos produits et alignons notre industrie sur la neutralité carbone, la biodiversité et la durabilité, en repensant et en redéfinissant chaque produit et service afin de les rendre véritablement durables.

Prendre soin de notre planète n'est pas seulement ce que nous faisons, c'est ce que nous sommes.

Nous choisissons d'être durables. Aujourd'hui. Demain. Toujours.

DIES IST UNSER MANIFEST FÜR CO2-NEUTRALITÄT.

Nachhaltigkeit ist kein fernes Ziel. Es ist eine tägliche Entscheidung, die alles bestimmt, was wir mit unseren Marken tun.

Auch wenn es die Technologie noch nicht ermöglicht, zu 100 % umweltfreundlich zu sein, haben wir uns entschieden, jetzt zu handeln. Wir transformieren unsere Produkte und richten unsere Branche auf CO₂-Neutralität, Biodiversität und Nachhaltigkeit aus. Wir überarbeiten und überdenken jedes Produkt und jede Dienstleistung, um sie wirklich nachhaltig zu gestalten.

Die Sorge um unseren Planeten ist nicht nur das, was wir tun – sie ist das, was wir sind.

Wir entscheiden uns für Nachhaltigkeit. Heute. Morgen. Immer.

ЭТО НАШ МАНИФЕСТ В ПОЛЬЗУ УГЛЕРОДНОЙ НЕЙТРАЛЬНОСТИ.

Устойчивое развитие - это не отдалённая цель. Это ежедневный выбор, который определяет всё, на чём основывается производство наших брендов.

Хотя технологии пока не позволяют нам быть на 100% экологичными, мы выбираем действовать уже сейчас. Мы трансформируем нашу продукцию и ориентируем нашу отрасль на принципы углеродной нейтральности, биоразнообразия и устойчивого развития, переосмысливая и модернизируя все продукты и услуги, чтобы сделать их по-настоящему экологичными.

Забота о нашей планете - это не просто то, что мы делаем, это то, кем мы являемся.

Мы выбираем быть устойчивыми. Сегодня. Завтра. Всегда.

QUESTO È IL NOSTRO MANIFESTO PER LA NEUTRALITÀ CARBONICA.

La sostenibilità non è un obiettivo lontano. È una scelta quotidiana che guida tutto ciò che facciamo nei nostri marchi.

Sebbene la tecnologia non abbia ancora reso possibile essere ecologici al 100%, abbiamo scelto di agire subito. Stiamo trasformando i nostri prodotti e allineando il nostro settore alla neutralità carbonica, alla biodiversità e alla sostenibilità, riprogettando e ripensando ogni prodotto e servizio per renderli veramente sostenibili.

Prenderci cura del nostro pianeta non è solo ciò che facciamo, è ciò che siamo.

Abbiamo scelto di essere sostenibili. Oggi. Domani. Sempre.

LOVE
CERAMIC TILES

Uma Escolha Sustentável

A Sustainable Choice | Un Choix Durable | Eine Nachhaltige Entscheidung | Выбор Устойчивости | Una Scelta Sostenibile

O QUE SIGNIFICA SER SUSTENTÁVEL?

Ser responsável

Através da nossa certificação EDP, medimos o impacto ambiental das nossas superfícies cerâmicas ao longo de todo o seu ciclo de vida.

Reduzir, reciclar e reincorporar

Reduzimos a espessura dos nossos produtos, diminuindo significativamente as emissões de CO₂.

Reincorporamos até 100% da água, energia e matérias-primas na produção, garantindo uma abordagem circular aos recursos.

Compensar

Produzimos energia solar nas nossas unidades industriais, reduzindo a nossa dependência de fontes não renováveis.

Para compensar ainda mais as nossas emissões de CO₂, investimos em créditos de carbono, que são certificados adquiridos por empresas para ajudar a compensar as emissões de CO₂ que produzem.

Inovar e certificar

As nossas cerâmicas são concebidas para garantir ambientes 100% livres de toxinas e são protegidas com a tecnologia antibacteriana Microban.

Possuem o selo Protect e certificações de confiança, garantindo segurança e desempenho.

WHAT DOES IT MEAN TO BE SUSTAINABLE?

To be accountable

Through our edp certification, we measure the environmental impact of our ceramic surfaces across their entire life cycle.

To be reducing, recycling & reincorporating

We have reduced the thickness of our products, significantly lowering CO₂ emissions.

We reincorporate up to 100% of water, energy and raw materials back into production, ensuring a circular approach to resources.

To be compensating

We produce solar energy in our industrial units, reducing our dependence on non-renewable sources.

To further offset our CO₂ emissions, we invest in carbon credits, that are certificates purchased by companies to help offset the CO₂ emissions they produce.

To be innovating & certifying

Our ceramics are designed to ensure 100% toxin-free environments and are protected with microban antibacterial technology.

They carry the protect seal and trusted certifications, guaranteeing safety and performance.

QUE SIGNIFIE ÊTRE DURABLE?

Être responsable

Grâce à notre certification EDP, nous mesurons l'impact environnemental de nos surfaces céramiques tout au long de leur cycle de vie.

Réduire, recycler et réutiliser

Nous avons réduit l'épaisseur de nos produits, ce qui a permis de réduire considérablement les émissions de CO₂.

Nous réutilisons jusqu'à 100 % de l'eau, de l'énergie et des matières premières dans notre production, garantissant ainsi une approche circulaire des ressources.

Être compensatoire

Nous produisons de l'énergie solaire dans nos unités industrielles, réduisant ainsi notre dépendance aux sources non renouvelables.

Afin de compenser davantage nos émissions de CO₂, nous investissons dans des crédits carbone, qui sont des certificats achetés par les entreprises pour aider à compenser les émissions de CO₂ qu'elles produisent.

Innover et certifier

Nos céramiques sont conçues pour garantir des environnements 100 % exempts de toxines et sont protégées par la technologie antibactérienne Microban.

Elles portent le label Protect et des certifications fiables, garantissant leur sécurité et leurs performances.

WAS BEDEUTET ES, NACHHALTIG ZU SEIN?

Verantwortung übernehmen

Durch unsere EDP-Zertifizierung messen wir die Umweltauswirkungen unserer Keramikoberflächen über ihren gesamten Lebenszyklus hinweg.

Reduzieren, recyceln und wiederverwenden

Wir haben die Stärke unserer Produkte reduziert und damit die CO₂-Emissionen deutlich gesenkt.

Wir führen bis zu 100 % des Wassers, der Energie und der Rohstoffe wieder in die Produktion zurück und gewährleisten so einen kreislaufwirtschaftlichen Umgang mit Ressourcen.

Kompensieren

Wir produzieren Solarenergie in unseren Industrieanlagen und reduzieren so unsere Abhängigkeit von nicht erneuerbaren Energiequellen.

Um unsere CO₂-Emissionen weiter auszugleichen, investieren wir in Emissionszertifikate, die von Unternehmen erworben werden, um ihre CO₂-Emissionen auszugleichen.

Innovation und Zertifizierung

Unsere Keramikprodukte sind so konzipiert, dass sie eine 100 % giftfreie Umgebung gewährleisten, und sind mit der antibakteriellen Microban-Technologie geschützt.

Sie tragen das Protect-Siegel und vertrauenswürdige Zertifizierungen, die Sicherheit und Leistung garantieren.

ЧТО ЗНАЧИТ БЫТЬ УСТОЙЧИВЫМ?

Быть ответственным

Благодаря нашей сертификации EDP мы оцениваем воздействие наших керамических поверхностей на окружающую среду на протяжении всего их жизненного цикла.

Сократить, перерабатывать и реинкорпорировать

Мы уменьшили толщину наших изделий, значительно сократив выбросы CO₂.

Мы вернули к производству до 100% воды, энергии и сырья, обеспечив циклический подход к ресурсам.

Компенсировать

Мы производим солнечную энергию на наших промышленных предприятиях, снижая нашу зависимость от невозобновляемых источников.

Чтобы дополнительно компенсировать выбросы CO₂, мы инвестируем в углеродные кредиты - сертификаты, приобретаемые компаниями для компенсации производимых ими выбросов CO₂.

Иновация и сертификация

Наша керамика разработана для обеспечения 100% отсутствия токсинов и защищена антибактериальной технологией Microban.

Она отмечена знаком Protect и имеет сертификаты, гарантирующие безопасность и эффективность.

COSA SIGNIFICA ESSERE SOSTENIBILI?

Essere responsabili

Attraverso la nostra certificazione EDP, misuriamo l'impatto ambientale delle nostre superfici ceramiche durante il loro intero ciclo di vita.

Ridurre, riciclare e reincorporare

Abbiamo ridotto lo spessore dei nostri prodotti, abbassando significativamente le emissioni di CO₂.

Reincorporiamo fino al 100% dell'acqua, dell'energia e delle materie prime nella produzione, garantendo un approccio circolare alle risorse.

Essere compensatori

Produciamo energia solare nei nostri stabilimenti industriali, riducendo la nostra dipendenza dalle fonti non rinnovabili.

Per compensare ulteriormente le nostre emissioni di CO₂, investiamo in crediti di carbonio, ovvero certificati acquistati dalle aziende per aiutare a compensare le emissioni di CO₂ che producono.

Innovazione e certificazione

Le nostre ceramiche sono progettate per garantire ambienti privi al 100% di sostanze tossiche e sono protette con la tecnologia antibatterica Microban.

Sono dotate del marchio Protect e di certificazioni affidabili, a garanzia della sicurezza e delle prestazioni.

HABITAR O PRESENTE VIVER O FUTURO

A Love Tiles cria coleções cerâmicas para habitar o presente e o futuro, plenas de beleza, dotadas de qualidade de um design exclusivo. A mesma beleza e a mesma harmonia que sonhamos para o mundo em nosso redor. Para isso a Love Tiles cria e protege, reduzindo ao mínimo o impacto ambiental da sua atividade, por meio da constante pesquisa da eco sustentabilidade no local de trabalho, nas matérias utilizadas e nos processos produtivos, como demonstram as certificações ambientais obtidas.

Queremos contribuir para que vivamos num mundo melhor, sabendo que a eco sustentabilidade é desenvolvimento olhando para o futuro...

Este é o nosso esforço quotidiano e a nossa responsabilidade social.

WOHNEN IN DER GEGENWART UND DIE ZUKUNFT ERLEBEN

Love Tiles kreiert Keramikkollektionen mit dem Konzept “wohnen in der gegenwart und die zukunft erleben”. Diese Kollektionen zeichnet eine außergewöhnliche Schönheit, höchste Qualität und exklusives Design aus. Dasselbe Schönheit und Harmonie, die wir uns für die Welt in unserem Umkreis erträumen. Danach richtet Love Tiles ihre Produktion aus: Für die Herstellung benutzen wir umweltschonende Verfahren, m.a.W. die Umwelt auswirkungen sind auf das Mindestmaß reduziert. Die gelingt uns durch konstante Forschungsarbeiten auf dem Gebiet der Öko-Nachhaltigkeit am Arbeitsplatz, bei den verwendeten Materialien und bei den Herstellungsverfahren. Davon zeugen die Umweltzertifikate, mit denen wir ausgezeichnet wurden.

Wir möchten einen Beitrag für eine bessere Welt leisten, wohl wissend, dass die Öko-Nachhaltigkeit Entwicklung in die Zukunft bedeutet.

Dies ist unser alltägliches Anliegen und unsere soziale Verantwortung.

ЖИТЬ В НАСТОЯЩЕМ И БУДУЩЕМ

Love Tiles создает керамические коллекции, чтобы жить настоящим и будущим, в окружении красоты эксклюзивного дизайна, защищенные качеством, созданные для жизни в полной свободе. Та же красота и изумительная гармония, о которых мы мечтаем, для мира вокруг нас.

Love Tiles создает свою продукцию и в то же время защищает природу, сводя к минимуму воздействие на окружающую среду, путем постоянного модернизирования и исследования используемых материалов и производственных процессов, наглядно это демонстрируют экологические сертификаты. Мы хотим внести свой вклад в лучший мир, и только то, что действительно eco-friendly, можно рассматривать как развитие с перспективой на будущее ... Это наша повседневная обязанность и наша социальная ответственность

ABITARE IL PRESENTE VIVERE IL FUTURO

Love Tiles crea collezioni ceramiche per abitare il presente e il futuro, piene di bellezza, con la qualità di un design unico. La stessa bellezza e armonia che sogniamo per il mondo che ci circonda. Per questa ragione Love Tiles crea e protegge, riducendo al minimo l'impatto ambientale delle proprie attività, attraverso la costante ricerca dell'ecosostenibilità sul posto di lavoro, nei materiali utilizzati e nei processi produttivi, come dimostrato dalle certificazioni ambientali ottenute.

Vogliamo contribuire a costruire un mondo migliore, sapendo che l'ecosostenibilità è sviluppo con uno sguardo al futuro.

Questo è il nostro sforzo quotidiano e la nostra responsabilità sociale.

A marca GREENGUARD certifica produtos que garantem os mais elevados padrões de qualidade do ar em espaços interiores.

Todas as coleções LOVE TILES em grés porcelânico, monoporosa e grés laminado obtiveram a certificação GREENGUARD GOLD, ou seja, a norma UL com os mais rigorosos limites relativos às emissões de COV (Compostos Orgânicos Voláteis), estando, assim, em condições de garantir as melhores condições de salubridade às pessoas que vivem e habitam espaços interiores. Por conseguinte, podem ser utilizadas em ambientes como escolas e estabelecimentos de saúde, frequentados por pessoas sensíveis, como crianças e idosos.

A GREENGUARD GOLD é uma certificação amplamente reconhecida e exigida pelos programas de construção sustentável e pelos regulamentos de projeto e construção em todo o mundo, tais como o LEED (internacional) e o BREEAM (Reino Unido).

The GREENGUARD brand certifies products that guarantee the highest standards of indoor air quality.

All LOVE TILES collections in porcelain stoneware, monoporous and laminated stoneware have obtained the GREENGUARD GOLD certification, that is, the UL standard with the strictest limits on VOC (Volatile Organic Compounds) emissions, thus being in a position to guarantee the best health conditions for people who live and dwell in indoor spaces. Therefore, they can be used in environments such as schools and healthcare facilities, frequented by sensitive people, such as children and the elderly.

GREENGUARD GOLD is a widely recognised certification, required by sustainable construction programmes and by design and construction regulations around the world, such as LEED (international) and BREEAM (UK).

La marque GREENGUARD certifie des produits qui garantissent les plus hauts standards de qualité de l'air dans les espaces intérieurs.

Toutes les collections LOVE TILES en grès cérame, monoporeuse et grès laminé ont obtenu la certification GREENGUARD GOLD, c'est-à-dire, la norme UL avec les limites les plus strictes d'émissions de COV (composés organiques volatils), étant ainsi en mesure de garantir les meilleures conditions sanitaires aux personnes qui vivent et habitent les espaces intérieurs. Ils peuvent donc être utilisés dans des environnements tels que les écoles et les établissements de santé, fréquentés par des personnes sensibles, comme les enfants et les personnes âgées.

GREENGUARD GOLD est une certification largement reconnue et exigée par les programmes de construction durable et les réglementations de conception et de construction dans le monde entier, telles que LEED (international) et BREEAM (Royaume-Uni).

Die Marke GREENGUARD zertifiziert Produkte, die die höchsten Standards der Luftqualität in Innenräumen garantieren.

Alle LOVE TILES-Kollektionen aus Feinsteinzeug, Monoporös und laminiertem Feinsteinzeug haben die GREENGUARD GOLD-Zertifizierung erhalten, d.h. die UL-Norm mit den strengsten Grenzwerten für FOV-Emissionen (Flüchtiger Organischer Verbindungen) und sind somit in der Lage, die besten Gesundheitsbedingungen für Menschen, die in Innenräumen leben und wohnen, zu gewährleisten. Daher, können sie in Umgebungen wie Schulen und Gesundheitseinrichtungen eingesetzt werden, die von empfindlichen Menschen wie Kindern und älteren Menschen frequentiert werden.

GREENGUARD GOLD ist eine Zertifizierung, die weithin anerkannt und von nachhaltigen Bauprogrammen und Design- und Bauvorschriften auf der ganzen Welt gefordert wird, wie LEED (international) und BREEAM (UK).

Марка GREENGUARD сертифицирует продукцию, которая гарантирует самые высокие стандарты качества воздуха в помещениях.

Все коллекции керамогранита, монопористого и ламинированного керамогранита LOVE TILES были сертифицированы GREENGUARD GOLD, то есть стандартом UL, с самыми строгими ограничениями на выбросы ЛОС (летучих органических соединений), что позволяет гарантировать наилучшее состояние здоровья людей, которые проживают или посещают внутренние пространства населенных пунктов. Поэтому данные материалы можно использовать в таких местах, как школы и медицинские учреждения, где могут присутствовать такие чувствительные люди, как дети и пожилые люди.

GREENGUARD GOLD является широко признанной сертификацией и требуется программами самообеспеченного строительства и всемирными нормами проектирования и строительства, такими как LEED (международный) и BREEAM (Великобритания).

Il marchio GREENGUARD certifica i prodotti che negli ambienti interni garantiscono i più elevati standard di qualità dell'aria.

Tutte le collezioni LOVE TILES in gres porcellanato, monoporosa e gres laminato hanno ottenuto la certificazione GREENGUARD GOLD, cioè lo standard di UL con i limiti più stringenti di emissioni di VOC, e sono perciò in grado di assicurare la migliore salubrità alle persone che vivono e che abitano gli ambienti. Per questo possono essere impiegate in ambienti come scuole e strutture sanitarie, frequentate da soggetti sensibili come i bambini e gli anziani.

GREENGUARD GOLD è una certificazione ampiamente riconosciuta e richiesta dai programmi di edilizia sostenibile e dai regolamenti di progettazione e costruzione in tutto il mondo, come il LEED (internazionale) e il BREEAM (UK).

TECNOLOGIA DE VANGUARDA

Cada matéria prima natural utilizada, cada processo produtivo e cada tecnologia da complexa actividade da unidade industrial da Love Tiles, são estudadas de forma a minimizar o impacto ambiental, poupando e reciclando, com a vontade de transformar desperdícios em recursos e otimizar a utilização da energia produzida. A Love Tiles está na vanguarda na adoção de medidas ecologicamente sustentáveis as quais são demonstradas pelos mais minuciosos controlos quotidianamente efectuados.

CUTTING-EDGE TECHNOLOGY

Each raw material used, each productive process and each technology of the complex activity of the Love Tiles sites are studied in order to reduce the environmental impact, by saving, recycling, filtering, with the will of transforming the waste in resources and optimize the use of energy. Love Tiles is on the cutting-edge of adopting ecologically sustainable practices and this is demonstrated by the most accurate controls, repeated on a daily basis.

TECNOLOGIE D'AVANT-GARDE

Chaque matière première, chaque processus productif et chaque technologie de la complexe activité des établissements de Panariagroup sont étudiés de façon à limiter l'impact environnemental en épargnant, recyclant et filtrant avec la volonté de transformer les déchets en ressources et optimiser l'usage de l'énergie produite. Gres Panaria Portugal est à l'avant-garde dans l'action et les pratiques pour l'environnement comme le démontrent les contrôles les plus exigeants répétés au quotidien.

SPITZENTECNOLOGIE

Love Tiles hat die verwendeten Rohstoffe, Produktionsverfahren und Techniken in der komplexen Unternehmensaktivität im Bereich der industriellen Produktion des Unternehmens im Hinblick auf die Umweltauswirkungen eingehendst analysiert. Materialeinsparungen und Recycling stehen auf der Tagesordnung. Aus Abfällen werden Ressourcen. Die Nutzung freigesetzter Energie ist optimiert. Love Tiles ist führend, was die Verwendung von ökologisch nachhaltigen Maßnahmen betrifft. Täglich minutiös durchgeführte Kontrollen sind der Beweis dafür.

НОВЕЙШИЕ ТЕХНОЛОГИИ

Используемое сырье, каждый производственный процесс и каждая технологическая цепочка комплексной деятельности Love Tiles изучаются с целью уменьшения воздействия на окружающую среду за счет энергосбережения, переработки, фильтрации, с намерением превратить отходы в ресурсы и оптимизировать использование энергии. Love Tiles находится в авангарде внедрения eco-friendly методов, о чем свидетельствуют самые тщательные ежедневные проверки.

TECNOLOGIA ALL'VANGUARDIA

Ciascuna delle materie prime naturali utilizzate, ogni processo produttivo e ogni tecnologia della complessa attività dell'unità industriale di Love Tiles, sono studiati per ridurre al minimo l'impatto ambientale, risparmiando e riciclando, con la volontà di trasformare i rifiuti in risorse e ottimizzare l'utilizzo dell'energia prodotta. Love Tiles è all'avanguardia nell'adozione di misure ecologicamente sostenibili, dimostrate dai più rigorosi controlli quotidiani effettuati.

A CERTIFICAÇÃO AMBIENTAL

A unidade industrial da Love Tiles obteve certificações ambientais internacionais de grande prestígio. Entidades e organismos de controlo reconheceram oficialmente o trabalho feito pela empresa para a salvaguarda dos recursos naturais do planeta. Esta certificação testemunha as boas práticas ambientais da Love Tiles, na salvaguarda do desenvolvimento sustentável. Esta é uma demonstração concreta de como é possível conciliar Qualidade, Inovação Industrial e Design com uma séria política de salvaguarda do ambiente.

THE ENVIRONMENT CERTIFICATION

Love Tiles have obtained the most prestigious International environmental certifications. Agencies and control bodies have officially recognized the work done by the company for the safeguarding of the earth's natural resources. These certifications are proof of the high standards attained by Love Tiles, a company which is a forerunner in terms of sustainable development. These are a clear proof of how it is possible to reconcile quality, industrial innovation and design with a serious policy for environmental safeguard.

LA CERTIFICATION ENVIRONNEMENTALE

Love Tiles a obtenu de prestigieuses certifications environnementales internationales. Les entités et les organismes de contrôle ont officiellement reconnu le travail fourni par l'entreprise pour la préservation des ressources naturelles de la planète. Cette certification témoigne des bonnes pratiques environnementales de Gres Panaria Portugal, pour la protection du développement durable. C'est une démonstration concrète de l'engagement de l'entreprise en termes de Qualité, d'Innovation et de Design, le tout allié à une sérieuse politique de protection de l'environnement.

UMWELTZERTIFIZIERUNG

ie Produktionseinheit der Love Tiles wurde weltweit mit Umweltzertifizierungen von großem Prestige ausgezeichnet. Körperschaften und Kontrolleinrichtungen erkannten offiziell das Unternehmen für seine Arbeit zum Erhalt der Naturressourcen auf der Erde an. Die Zertifizierungen bezeugen die guten Umweltpraktiken der Love Tiles für die Wahrung der nachhaltigen Entwicklung. Dies ist ein konkreter Beweis dafür, dass es möglich ist, Qualität, industrielle Innovation und Design mit einer ernsthaften Politik der Umwelterhaltung zu vereinbaren.

ЭКОЛОГИЧЕСКАЯ СЕРТИФИКАЦИЯ

Производственное предприятие Love Tiles получило престижные международные экологические сертификаты. Юридические лица и контролирующие органы официально признали работу, проделанную компанией по охране природных ресурсов планеты. Данная сертификация свидетельствует о хороших методах защиты окружающей среды Love Tiles для обеспечения устойчивого развития. Это конкретная демонстрация того, как можно совместить качество, промышленные инновации и дизайн с серьезной политикой защиты окружающей среды.

A CERTIFICAZIONE AMBIENTALE

L'unità industriale di Love Tiles ha ottenuto prestigiose certificazioni ambientali internazionali. Enti e organismi di controllo hanno ufficialmente riconosciuto il lavoro svolto dalla società per la salvaguardia delle risorse naturali del pianeta. Questa certificazione attesta le buone pratiche ambientali di Love Tiles, nella tutela dello sviluppo sostenibile. Si tratta di una concreta dimostrazione di come sia possibile conciliare Qualità, Innovazione Industriale e Design con una seria politica di tutela dell'ambiente.

As características técnicas bem como a facilidade de instalação, com ou sem colas (instalação a seco em relva, gralva ou pavimentos sobreelevados), fazem das placas cerâmicas Love Tiles 20MM a melhor solução para a pavimentação de espaços exteriores sejam eles públicos ou privados, tais como jardins, garagens, caminhos pedonais, terraços, piscinas, áreas urbanas, etc.

Trata-se igualmente de uma boa solução para combinar espaços interiores e exteriores.

The characteristics of the product and the ease of installation, both with or without adhesive (dry installation on grass, gravel, or elevated floors), make the 20MM thick porcelain tile by Love Tiles the best solution for external flooring of public and residential areas, such as urban spaces, pavements, garden paths, car parks, terraces, swimming pool edges, bathing facilities, parks and much more.

The best solution to match external and internal spaces.

Les caractéristiques du produit ainsi que l’extrême facilité de pose aussi bien à sec (sur herbe, gravier, sols surélevés) qu’avec adhésif, font du grès cérame Love Tiles épaisseur 20MM, la meilleure solution pour les pavages externes de zones publiques et résidentielles: places urbaines, trottoirs, voies piétonnes, parkings, terrasses, bords de piscine, établissements balnéaires, aménagement public paysager et bien d’autres domaines encore.

Une solution optimale pour obtenir un ensemble parfaitement coordonné entre intérieur et extérieur.

Die Produkteigenschaften und extreme Einfachheit sowohl der Trockenverlegung (auf Gras, Kies, als Doppelboden) als auch der Klebverlegung, machen das Feinsteinzeug von Love Tiles mit 20MM Stärke zur besten Lösung bei Bodenbelägen im Außenbereich von öffentlichen und privaten Anlagen: Stadtplätze, Bürgersteige, Wege, Parkplätze, Terrassen, Poolumrandungen, Badeanlagen, öffentliche Grünanlagen und vieles mehr.

Die beste Lösung um eine optimale Koordination zwischen Innen- und Außenbereich zu erhalten.

Технические характеристики и простота укладки, с или без использования клея (сухая укладка поверх травы, поверх гравия или фальшпола), делают керамогранит 20 мм от Love Tiles отличным решением для мощения различных пространств, садов, гаражей, пешеходных дорожек, террас, плавательных бассейнов, городских районов и т.д.

Также является хорошим решением для комбинирования пространств внутренних и наружных.

Le caratteristiche tecniche e la facilità di posa, sia a secco (su erba, ghiaia, in pavimenti sopraelevati) che a colla, rendono le piastrelle in ceramica 20MM Love Tiles la migliore soluzione per la pavimentazione di spazi esterni, siano essi pubblici o privati, come giardini, garage, passaggi pedonali, terrazze, piscine, aree urbane, ecc.

È anche una buona soluzione per ottenere un ottimo coordinabilità tra interno ed esterno.

Antes de iniciar o assentamento do material cerâmico, deverá ter em consideração os seguintes aspetos:

- Verificar se o material cerâmico é indicado para utilizar no local selecionado de acordo com as suas especificações e características técnicas;
- Verificar se existe material suficiente para realizar a obra;
- Confirmar nas caixas se o produto é da mesma tonalidade, escolha e calibre.

O bom desempenho do material cerâmico depende fortemente das condições de aplicação pelo que é de extrema importância garantir os seguintes pressupostos:

Before (beginning the) laying (of) ceramic material, you should take the following aspects into account:

- Check if the ceramic material is suitable for (use at) the selected site, according to its specifications and technical characteristics;
- Check whether there is enough material to conclude the work;
- Check the boxes to see/confirm in the boxes if the product is in the same shade, choice and caliber.

The good performance of the ceramic material depends strongly on the conditions of application for which it is extremely important to ensure the following assumptions:

Avant de commencer la pose du matériau céramique, les aspects suivants devront être pris en considération:

- Vérifier si le matériau céramique est indiqué pour une utilisation dans le lieu choisi, conformément à ses spécifications et caractéristiques techniques;
- Vérifier s'il existe la quantité de matériau suffisante pour réaliser le chantier;
- Confirmer dans les boîtes si le produit est du même ton, de la même qualité, et du même calibre.

La bonne performance du matériau céramique dépend fortement des conditions d'application. Il est donc extrêmement important de garantir les conditions préalables suivantes:

Vor dem Beginn der Verlegearbeiten sollten Sie folgende Punkte berücksichtigen:

- Bitte überprüfen Sie, ob die gewählte Fliese laut ihrer Oberflächenbeschaffenheit und ihren technischen Eigenschaften geeignet für das Einsatzgebiet ist;
- Bitte prüfen Sie nach, ob die Menge der gewählten Fliese ausreicht, um das geplante Bauprojekt fertig zu stellen;
- Bitte prüfen Sie, ob die Fliesen aus verschiedenen Kartons dieselbe Beschaffenheit, (Ton, Wahl und Kaliber) haben.

- Die Leistungsfähigkeit der Fliese hängt stark davon ab, wie die Fliesen verlegt werden. Daher ist es sehr wichtig, die folgenden Punkte zu beachten:

Перед началом работ по утсановке керамического материала необходимо учесть следующие моменты:

- Проверить, подходит ли керамический материал для использования в назначенном месте согласно его свойствам и техническим характеристикам;
- Проверить, имеется ли материал в количестве, достаточном для производства работ;
- Проверить по упаковкам, является ли продукция того же оттенка, ассортимента и размера.

Хорошие эксплуатационные показатели использования керамического материала сильно зависят от условий кладки, поэтому исключительно важно обеспечить следующие предпосылки:

Prima di iniziare la posa del materiale ceramico, occorre tener conto dei seguenti aspetti:

- Controllare che il materiale ceramico sia idoneo per l'uso nella posizione selezionata secondo le sue specifiche e caratteristiche tecniche;
- Verificare se c'è abbastanza materiale per eseguire il lavoro;
- Confermare sulle scatole se il prodotto è della stessa tonalità, selezione e calibro.

Le buone prestazioni del materiale ceramico dipendono in gran parte dalle condizioni di posa ed è quindi estremamente importante garantire i seguenti presupposti:

01

O SUPORTE
O suporte deve apresentar-se estável, limpo de resíduos, fendas e poeiras. Deverão ser respeitados os tempos de cura e estabilidade dos tratamentos a que possa ter sido sujeito. Deve fazer-se a verificação da planaridade do mesmo, procedendo à regularização, se necessário com a ajuda de produtos adequados a esse fim. Estes aspetos são vitais para pavimentos e revestimentos cerâmicos.

SUPPORT
The support must be stable, free of debris, dust and cracks. Curing times and stability of the treatments to which the support may have been subjected should be respected. You should check its flatness and stabilize it, if necessary with the help of products suitable for the purpose. These aspects are vital for wall and floor ceramic tiles.

LE SUPPORT
Le support doit être stable, exempt de résidus, fentes et poussières. Les temps de durcissement et de stabilité des traitements auxquels il doit être soumis devront être respectés. La planéité du support doit être vérifiée et le nivellement doit être réalisé si cela est nécessaire, à l'aide de produits appropriés. Ces aspects sont essentiels pour les revêtements de sol et muraux céramiques.

DER UNTERGRUND
Der Untergrund muss stabil, sauber, sowie frei von Rissen und Staub sein. Sollte der Untergrund vor dem Verlegen der Fliesen speziell behandelt werden müssen, so sollten Sie darauf achten, dass die Behandlung gut gelungen und abgeschlossen ist, bevor Sie die Fliesen verlegen. Sie sollten den Untergrund inspizieren. Falls er nicht eben ist, muss er mit Hilfe von passenden Produkten grundiert werden. Diese Vorsicht ist angebracht und eine unabdingbare Voraussetzung für das fachgerechte Verlegen von Boden- und Wandfliesen.

ОПОРНАЯ ОСНОВА
Опорная основа должна быть устойчивой, очищенной от отходов, трещин и пыли. Должны соблюдаться сроки полного высыхания и устойчивости процессов обработки, которым она может быть подвержена покрытия. Следует произвести проверку на плоскостность и, если нужно, отрегулировать ее с использованием предназначенных для этого материалы. Эти аспекты являются жизненно важными при установке керамических напольных покрытий и облицовке.

SUPPORTO
Il supporto deve essere stabile, privo di sporcizia, polvere e crepe. Le tempistiche di presa e di stabilità dei trattamenti a cui potrebbe essere stato sottoposto devono essere rispettate. Occorre controllare la sua planarità, livellandolo, se necessario, con l'aiuto di prodotti idonei a tale scopo. Questi aspetti sono fondamentali per pavimenti e rivestimenti in ceramica.

02

O MATERIAL
Para obter um melhor efeito visual do produto, aconselha-se a utilização, alternada, de peças cerâmicas retiradas de várias embalagens em simultâneo. Caso o produto seja destonalizado ou tenha gráfica e tonalidade diferente, deverá ser aplicado de forma aleatória.

MATERIAL
For a better visual effect of the product, it is advisable to use alternating ceramic pieces taken from various packages simultaneously. If the product has shade variations or has different graphics and shades, it should be applied randomly.

LE MATÉRIAU
Pour obtenir un meilleur effet visuel avec le produit, il est conseillé d'utiliser de forme alternée des pièces céramiques retirées simultanément de plusieurs emballages. Si le produit est dénuancé ou a un aspect graphique différent et une tonalité différente, il devra être appliqué de forme aléatoire.

DAS MATERIAL
Damit Sie das beste Ergebnis erzielen, ist es ratsam, die Fliesen immer aus verschiedenen Paketen zu wählen und in regelmäßig abwechselnder Folge zu verlegen. Falls das Produkt diverse Farbschattierung, einen unterschiedliche Farbton oder grafisches Design aufweist, müssen die Fliesen auf diese Weise verlegt werden.

МАТЕРИАЛ
Для получения лучшего визуального эффекта советуем использовать попеременно керамические образцы, беря их из разных коробок одновременно. Если продукция без оттенков или с различающимися графическими изображениями и тональностью, установка должна осуществляться в произвольном порядке.

MATERIALE
Per ottenere un migliore effetto visivo del prodotto, si consiglia di utilizzare, in modo alternato, pezzi in ceramica prelevati contemporaneamente da diverse scatole. Se il prodotto è stonalizzato o ha una grafica e tonalità diversa, deve essere applicato in modo casuale.

03

JUNTAS DE ASSENTAMENTO
Tendo em vista uma perfeita aplicação das peças cerâmicas, deve usar-se obrigatoriamente juntas de assentamento. Estas cumprem importantes funções estéticas e técnicas, facilitando o alinhamento dos materiais, absorvendo eventuais deformações que se possam fazer sentir na estrutura – chão e parede – e impedindo, assim, a transmissão destas deformações às peças cerâmicas. Aconselhamos a utilização de niveladores aquando da aplicação de material de grandes formatos – 45x120, 35x100, 60x90 e 80x80. Utilizar as juntas mínimas recomendadas de forma a garantir um bom aspeto estético das peças cerâmicas, bem como respeitar as normas de aplicação. NOTA: independentemente dos valores aqui apresentados, o aplicador deverá sempre seguir as normativas dos países onde está a fazer este trabalho de aplicação.

JOINTS FOR TILE-LAYING
For a perfect application of the ceramic pieces, you should definitely use joints. They fulfill important aesthetic and technical functions, facilitating alignment of the materials, absorbing any possible deformation liable to be felt in the structure - floor and wall - thus preventing the transmission of deformations to the ceramic pieces. We advise the use of leveling systems when applying big ceramic formats material – 45x120, 35x100, 60x90 and 80x80. Use the minimum recommended joints so as to ensure a good aesthetic aspect of the ceramic pieces, and respect the rules of application as follows. NOTE: Regardless of the values presented here, the person applying it should always follow the regulations of the countries where he is doing this application work.

JOINTS DE POSE
L'utilisation de joints de pose est obligatoire afin d'obtenir une pose parfaite des pièces céramiques,. Ils remplissent une importante fonction esthétique et technique. Ils facilitent l'alignement des matériaux et absorbent d'éventuelles déformations qui peuvent se produire dans la structure – sols et murs – et empêchent donc la transmission de ces déformations aux pièces céramiques. Nous recommandons l'utilisation de niveleurs lors de l'application de matériaux de grand format– 45x120, 35x100, 60x90 e 80x80. Utiliser Les joints minimaux recommandés afin de garantir un bon aspect esthétique des pièces céramiques et respecter les normes d'application sont les suivants. REMARQUE: Indépendamment des valeurs ici présentées, l'applicateur devra toujours suivre les réglementations du pays où il réalise ce travail d'application.

DAS VERFUGEN
Um die keramischen Platten perfekt zu verlegen, sollten Sie die Wand oder den Boden ordnungsgemäß verfugen. Die Fugen haben wichtige ästhetische und technische Funktionen. Sie erleichtern das Aufreihen der Fliesen; sie absorbieren eventuelle Verformungen der Wand oder des Bodens, und vermeiden dadurch die Übertragung dieser Verformungen auf die Fliesen. Wir empfehlen die Benutzung von selbstnivellierenden Abstandhaltern, wenn es darum geht, Fliesen von grösseren Formaten zu verlegen, wie zum Beispiel (45x120, 35x100, 60x90, 80x80). Die empfohlenen Fugenbreiten, welche eine schöne Optik sowie eine regelgerechte Verlegung gewährleisten, sind nachfolgend angegeben. WICHTIG: Abgesehen von den oben angegebenen Fugenbreiten, muss der Fliesenleger immer den jeweils geltenden landesspezifischen Vorschriften Folge leisten.

ПРОКЛАДКИ
Для получения безукоризненного результата при установке керамических деталей следует обязательно использовать прокладки. Они играют важную эстетическую и техническую роль, облегчая выравнивание материала, вбирая в себя возможную деформацию, которая может чувствоваться в структуре (пола и стены), препятствуя, таким образом, передаче этой деформации керамическим деталям. Рекомендуем использовать системы выравнивания при укладке крупноформатной плитки - 45x120, 35x100, 60x90 и 80x80. Использовать рекомендуемые минимальные прокладки, чтобы обеспечить отличный эстетический вид керамических деталей, а также соблюдать правила установки. ПРИМЕЧАНИЕ: Независимо от приведённых здесь значений, специалист всегда должен соблюдать нормы той страны, в которой производит работы по укладке.

FUGHE
Per una perfetta posa delle piastrelle in ceramica, devono essere eseguite delle fughe. Queste svolgono importanti funzioni estetiche e tecniche, facilitando l'allineamento dei materiali, assorbendo eventuali deformazioni che potrebbero manifestarsi sulla struttura – pavimento e parete – e quindi prevenendo la trasmissione di queste deformazioni alle piastrelle in ceramica. Si consiglia l'uso di livellatori quando si applicano materiali di grande formato – 45x120, 35x100, 60x90 e 80x80. Utilizzare le fughe minime raccomandate per garantire un buon aspetto estetico delle piastrelle in ceramica e rispettare le modalità di posa. NOTA: indipendentemente dai valori sopra riportati, il posatore deve fare sempre riferimento alle specifiche normative vigenti nel paese in cui sta eseguendo questo lavoro di posa.

*
Para as cores escuras recomenda-se acrescentar 2mm à junta mínima. Consultar a ficha técnica do respetivo produto no site.

It's recommended to increase in 2mm the minimum joint in the darker colours. For further information please go to our website and read product's technical data sheet.

Pour les couleurs foncées il est recommandé de rajouter 2mm au joint minimum. Consultez la fiche technique du produit respectif sur le site web.

Bei dunklen Farben wird empfohlen, 2 mm zur Mindestfuge noch weiter hinzuzufügen. Konsultieren Sie das technische Datenblatt des Produkts auf der Website.

Для темных цветов рекомендуется добавить 2 мм к минимальному шву. Обратитесь к техническим данным соответствующего продукта на веб-сайте.

Per i colori scuri si consiglia di aggiungere 2 mm al giunto minimo. Consultare la scheda tecnica del rispettivo prodotto sul sito web.

04

COLA E ARGAMASSAS
As argamassas, argamassas de rejuntamento, cimentos-colas e colas a utilizar deverão ter em conta o suporte e o fim a que se destinam as peças cerâmicas - interior, exterior, parede, pavimento - e a sua tipologia - monoporosa ou grés esmaltado. Deverá seguir as instruções indicadas pelo fabricante sobre a sua utilização.

GLUE AND MORTAR
The mortars, grouting mortars, glue-cements, and glues to be used should take into account both the support and the intended purpose of the ceramic pieces - indoor, outdoor, wall, floor - and their typology – mono-porous / monoporosa or glazed stoneware. You should follow the instructions provided by the manufacturer on its use.

COLLE ET MORTIERS
Les mortiers, mortiers de rejointoiement, ciments-colles et colles à utiliser devront tenir compte du support et de la fin à laquelle sont destinées les pièces céramiques - intérieur, extérieur, mur, plancher - ainsi que de leur typologie - monoporosa ou grès émaillé. Vous devrez suivre les instructions indiquées par le fabricant pour son utilisation.

KLEBER UND MÖRTEL
Welchen Mörtel, welchen Zementkleber oder welche andere Verbundmittel Sie am besten verwenden, hängt sowohl vom Untergrund als auch vom Material (Monoporosa, glasierte Fliesen) ab. Es kommt ebenso darauf an, ob die Fliesen im Außen- oder Innenbereich, an der Wand oder am Boden verlegt werden. Bitte befolgen Sie die Herstellerangaben zum Gebrauch des Produktes.

КЛЕИ И РАСТВОРЫ
При выборе растворов, тампонажных растворов, цементных клеев и других видов клея необходимо учитывать основу и назначение керамических деталей – наружное, внутреннее, стены, напольное покрытие – и его типологию – монопористый или эмалированный керамогранит. Необходимо соблюдать инструкции по их применению, разработанные производителем.

COLLE E MALTE
Le malte, malte fuganti, cementi-colla e colle da utilizzare devono tener conto del supporto e della destinazione delle piastrelle in ceramica – interno, esterno, parete, pavimento – e della loro tipologia – monoporosa o gres porcellanato smaltato. Seguire le istruzioni per l'uso fornite dal fabbricante.

05

INSTRUÇÕES DE CORTE
Recomendamos o corte com arrefecimento de água ou utilização de cortador manual com método de marcação e corte durante o processo de instalação. Não usar ferramentas elétricas com corte a seco durante o processo de instalação. Técnicas de instalação impróprias poderão expor o instalador à poeira de sílica de forma prejudicial.

CUTTING INSTRUCTIONS
We recommend wet cutting or the score and snap method during the installation process. Do not dry cut using power tools during the installation process. Improper installation techniques could expose installer to harmful silica dust.

INSTRUCTIONS DE DÉCOUPE
Nous recommandons la découpe avec refroidissement d'eau ou usage d'un découpant manuel avec méthode de marcase et decoupage pendant la pose. Ne pas utiliser d'outils électriques ou de decoupage à sec pendant la pose. Des techniques de pose inadéquates pourront exposer le poseur à des poussières de sylice et nuire à la santé.

SCHNEIDEEMPFEHLUNG
Wir empfehlen das Nassschneiden oder die Ritz- und Brechmethode während des Installationsprozesses. Während des Installationsvorgangs nicht mit Elektrowerkzeugen trocken schneiden. Durch unsachgemäße Installationstechniken kann der Installateur schädlichem Quarzstaub ausgesetzt werden.

ИНСТРУКЦИИ ПО РЕЗКЕ
Мы рекомендуем резку с водяным охлаждением или ручным плиткорезом с маркировкой и методом резки впроцессе установки. Не используйте электроинструменты при сухой резке в процессе установки. Неправильные методы укладки плитки зачастую сопровождаются выделением большого количества вреднойкварцевой пыли, которое в свою очередь может отрицательно воздействовать на укладчика.

ISTRUZIONI PER IL TAGLIO
Si consiglia di utilizzare macchinari con raffreddamento ad acqua o utilizzare una taglierina manuale con un metodo di marcatura e taglio. Non utilizzare utensili elettrici con taglio a secco . Tecniche di installazione non corrette possono esporre l'installatore a polvere di silice dannosa per la salute.

06

FUROS
Na furação deverão ser utilizadas brocas cranianas diamantadas com diâmetro adaptável ao furo pretendido.

HOLES
For drilling you should use diamond twist drills with a diameter adaptable to the desired hole.

PERÇAGES
Pour le perçage, utiliser des trépan diamantés avec un diamètre adapté au trou désiré.

LÖCHER
Löcher sollten im gewünschten Durchmesser mittels einer Diamanthammerbohrkrone in die Fliese gebohrt werden.

ОТВЕРСТИЯ
При сверлении отверстий необходимо использовать алмазные сверла диаметра, соответствующего предполагаемому отверстию.

FORI
Per realizzare fori circolari sulle piastrelle devono essere utilizzate delle frese a tazza diamantata con un diametro adattabile al foro stesso.

07

SEGURANÇA NA PREPARAÇÃO E ASSENTAMENTO DO MATERIAL
Aconselha-se a utilização de EPI (equipamento de proteção individual) adequado, nomeadamente, calçado de segurança, luvas de proteção e ainda óculos e proteção auditiva nas operações de corte do material.
Devem ser cumpridas as boas práticas a nível do levantamento e transporte manual de cargas.

SAFETY AND PREPARATION FOR LAYING THE MATERIAL
We advise the use of appropriate PPE (personal protective equipment), namely safety footwear, protective gloves and even goggles (safety glasses) and hearing protection in operations of cutting material.
Good practices must be followed in terms of lifting and carrying loads.

SÉCURITÉ LORS DE LA PRÉPARATION ET DE LA POSE DU MATÉRIAU
Il est conseillé d'utiliser un EPI (équipement de protection individuelle) approprié, notamment des chaussures de sécurité, des gants de protection, mais aussi des lunettes et une protection auditive lors des opérations de coupe du matériau.
Respectez les bonnes pratiques concernant le levage et le transport manuel de charges devront être appliquées.

SICHERHEITSHINWEISE FÜR DAS VERLEGEN VON FLIESEN
Wir empfehlen Ihnen, immer die passende Schutzkleidung zu tragen. Wir ermahnen Sie eindringlich, Schutzschuhe, -handschuhe, -brille sowie Gehörschutz zu benützen, wenn Sie die Fliesen zuschneiden.
Achten Sie bitte auf die richtige Körperhaltung, wenn Sie Lasten heben und tragen.

ОХРАНА ТРУДА ПРИ ПОДГОТОВКЕ И УКЛАДКЕ МАТЕРИАЛА
Рекомендуется использование подходящих СИЗ (средств индивидуальной защиты), а именно, безопасной обуви, защитных перчаток, а также очков и средств звуковой защиты при резке материала.
Необходимо соблюдать правила безопасности при ручном подъёме и транспортировке грузов.

SICUREZZA NELLA PREPARAZIONE E POSA DEL MATERIALE
Si consiglia l'uso dei DPI (dispositivi di protezione individuale) idonei, quali scarpe antinfortunistiche, guanti di protezione e occhiali, nonché protezione dell'udito nelle operazioni di taglio del materiale.
Devono anche essere rispettate le buone pratiche a livello di sollevamento e movimentazione manuale dei carichi.

08

PROTEÇÃO E LIMPEZA
Imediatamente após o assentamento do material cerâmico recomenda-se que as peças cerâmicas sejam devidamente protegidas. Para remoção de sujidade pós-obra, tais como resto de junta, cimentos, etc, recomenda-se a utilização de um ácido desincrustante tamponado para remoção de todos os resíduos.
Na manutenção diária poderão ser utilizados detergentes comuns, respeitando as diluições recomendadas pelo respetivo fabricante.
Relativamente às peças decoradas, dever-se-á evitar a utilização de produtos de limpeza abrasivos, poderão danificar as peças.
As peças decoradas através da deposição de partículas de titânio - Genesis, acabamento gold, silver e copper - que lhe conferem um aspeto metálico deverão ser manuseadas com cuidado. A limpeza final e de manutenção deste tipo de produto deverá ser feita com detergentes próprios para metais – abrillantador de aço inox - de forma a criar um efeito antiestático que possa repelir a sujidade e proteger o produto de gorduras e corrosão. A limpeza regular do produto deverá ser feita com um pano humedecido em água ou limpa-vidros, e após secagem deverá ser passado um pano seco.

PROTECTION AND CLEANING
All residues of glue and grout mortar should be cleaned from the surface of the parts immediately after application and in accordance with the manufacturer's instructions. Immediately after the laying of ceramic material it is recommended that the ceramic parts are / will be duly protected. For dirt removal after the work, such as left-over joints, cements, etc., it is recommended that you use a buffered descaling acid to remove all residues.
In daily maintenance, ordinary detergents may be used, respecting the dilutions recommended by the respective manufacturer.
Regarding decorated pieces, you should avoid the use of abrasive cleansers that may damage the pieces. Pieces decorated through the depositing of titanium particles - Genesis: Gold, Silver, Copper - which give them a metallic aspect should be handled with care. The final cleaning and maintenance of this type of product should be made with detergents suitable for metals - stainless steel brightener - so as to create an antistatic effect that can repel dirt and protect the product from fats and corrosion. Regular cleaning of the product should be done with a damp cloth moisturized with water or window cleaner, and after it gets dry, a dry cloth shall be used.

PROTECTION ET NETTOYAGE
Tous les résidus de colle et de mortier de jointoiement doivent être nettoyés de la surface des pièces immédiatement après l'application et conformément aux instructions du fabricant.
Immédiatement après la pose du matériau céramique, il est recommandé de protéger correctement les pièces céramiques. Pour l'élimination de la saleté résultant des travaux, comme les résidus de joints, ciments, etc., il est recommandé d'utiliser un acide tamponné désincrustant.
L'entretien quotidien pourra être réalisé avec des détergents ordinaires, en respectant les dilutions recommandées par le fabricant respectif.
Pour les pièces décorées, l'utilisation de produits de nettoyage abrasifs devra être évitée car ils pourront endommager les pièces.
Les pièces décorées grâce au dépôt de particules de titane - Genesis: Gold, Silver, Copper - qui lui confèrent un aspect métallique, devront être manipulées avec soin. Le nettoyage final et d'entretien de ce type de produit devra être réalisé avec des détergents spécifiques pour les métaux – agent de brillantage d'acier inox - afin de créer un effet antistatique qui puisse repousser la saleté et protéger le produit des graisses et de la corrosion. Le nettoyage régulier du produit doit être effectué avec un chiffon imbibé d'eau ou de nettoyant pour vitres et, après séchage, on doit passer un chiffon sec.

SCHUTZ UND REINIGUNG
Alle Rückstände von Klebstoff und Fugenmörtel sollten von der Oberfläche der Stücke unmittelbar nach dem Auftragen und in Übereinstimmung mit den Anweisungen des Herstellers gereinigt werden.
Bitte vergessen Sie nicht sofort nach Beendigung der Verlegearbeiten, die verfliese Fläche ordnungsgemäß zu schützen. Waschen Sie die verfliese Fläche mit Säure um etwaigen Schmutz (wie z.B.: Schlieren vom Fugenmaterial, Zement, etc.) zu beseitigen.
Für die alltägliche Pflege empfehlen wir die Verwendung von handelsüblichen Reinigungsmitteln. Beachten Sie bitte die Verdünnungsanweisung des Herstellers des Produktes.
Die Pflege und die Reinigung der keramischen Platten ist sehr einfach und sollte mit neutralen Putzmitteln durchgeführt werden.
Bitte befolgen Sie die Herstellerangaben zum Gebrauch des Produktes.
Schleifmittel können zur Beschädigung der Dekore führen und sind daher zu vermeiden.
Genesis - Gold, Silver und Copper Stücke die durch die Ablagerung von Titanpartikeln - die ihnen einen metallischen Aspekt geben, verziert sind, sollten mit Vorsicht behandelt werden. Die Endreinigung und Wartung dieses Produkttyps sollte mit für Metalle geeigneten Reinigungsmitteln - Aufheller aus rostfreiem Stahl - durchgeführt werden, um eine antistatische Wirkung zu erzielen, die Schmutz abweisen und das Produkt vor Fetten und Korrosion schützen kann. Die regelmäßige Reinigung des Produkts sollte mit einem mit Wasser oder Glasreiniger angefeuchteten Tuch erfolgen. Nach dem Trocknen sollte man die Flächen mit einem trockenen Tuch abwischen.

ЗАЩИТА И ЧИСТКА
Все остатки клея и цементные затирки необходимо удалить с поверхности плиток сразу же после их нанесения и в соответствии с инструкциями производителя.
Непосредственно после укладки керамического материала рекомендуется принять меры по защите керамических изделий. После удаления загрязнений, возникших в ходе работы, таких как излишки прокладки, цементирования, и т.д., рекомендуется использовать буферную кислоту для удаления всех остатков.
В повседневной чистке можно использовать обычные моющие средства, соблюдая нормы разбавления, указанные изготовителем.
В том, что касается декорированных деталей, следует избегать использование абразивных моющих средств, поскольку они могут повредить детали.
С деталями, декорированными путем осаждения титановых частиц – коллекция Genesis, цвета gold, silver и copper - придающих им металлический вид, необходимо обращаться осторожно. Их окончательная и повседневная мойка должна производиться моющими средствами, специально предназначенными для металлов (полирующий состав для нержавеющей стали), чтобы создать антистатический эффект для отражения грязи и защиты продукции от жирных веществ и коррозии. Регулярную очистку покрытия из керамогранита следует выполнять тряпкой, смоченной в воде или в чистящем средстве для стёкол, а после того, как поверхность высохнет - протереть сухой тряпочкой.

ROTEZIONE E PULIZIA
Tutti i residui di adesivo e stucco devono essere rimossi dalla superficie delle piastrelle subito dopo l'applicazione e secondo le istruzioni del produttore.
Subito dopo la posa del materiale ceramico è consigliabile che le piastrelle in ceramica siano adeguatamente protette. Per rimuovere lo sporco di fine cantiere, come resti di fughe, cementi, ecc, si consiglia di utilizzare un disincrostante acido tamponato per rimuovere tutti i residui.
Nella manutenzione quotidiana possono essere utilizzati dei normali detersivi, secondo le diluizioni raccomandate dal rispettivo fabbricante.
Per quanto riguarda i pezzi decorati, evitare l'uso di detersivi abrasivi, poiché possono danneggiare i pezzi.
I pezzi decorati mediante la deposizione di particelle di titanio - Genesis: Gold, Silver, Copper - che danno loro un aspetto metallico devono essere maneggiati con cura. La pulizia finale e manutenzione di questo tipo di prodotto devono essere eseguite con detersivi per metalli – brillantante per acciaio inox – al fine di creare un effetto statico in grado di respingere la sporcizia e proteggere il prodotto dai grassi e dalla corrosione. La pulizia periodica del prodotto deve essere eseguita con un panno inumidito con acqua o detersivo per vetri e, dopo l'asciugatura, passare un panno asciutto.

09

PRODUTOS POLIDOS
As peças das séries de acabamento polido e amaciado exigem um tratamento de aplicação e de manutenção especializadas.
O acabamento POLIDO, para além de ser aconselhado para revestimentos, é também indicado para pavimentos de ambientes residenciais ou comerciais de tráfego ligeiro, não sujeitos a elevada utilização, ou onde não sejam requeridas quaisquer prestações antiderrapantes. A presença esporádica de pequenas não uniformidades ou pontos na superfície deve ser considerada uma característica do material e do seu particular acabamento. Se o produto for colocado em contato direto com o exterior, recomenda-se o uso de soluções protetoras de modo a reduzir a possibilidade de formação de riscos. É da responsabilidade do instalador providenciar sempre a proteção das peças cerâmicas acabadas e limpas, antes da entrega ao cliente, utilizando materiais de proteção adequados (por ex. painéis de aglomerado, folhas de cartão, etc.).

Cola e Argamassa
Utilizar argamassas para betumação, de preferência de cor idêntica à cor do produto, e de acordo com a especificação do produto - grés.
Aplicação e primeira limpeza
Na sua aplicação deverá ter o máximo cuidado na remoção das argamassas utilizadas para rejuntar. A limpeza deve ser efetuada, enquanto as argamassas da junta ainda estiverem húmidas, com um pano ou esponja molhada, devendo-se evitar a utilização de detergentes abrasivos que poderão danificar as peças.
Caso as peças apresentem excesso seco de impermeabilizante, a melhor forma de o remover é, esfregando com papel ou pano limpo e seco, podendo essa limpeza ser realizada manualmente ou usando uma monoespátula apropriada.
Aconselhamos que esta limpeza seja realizada sem nenhum tipo de materiais abrasivos ou contaminantes. Uma eventual limpeza com produtos líquidos pode ser potenciadora na diminuição da eficácia do tratamento repelente e protetivo pretendido com a aplicação impermeabilizante.

Manutenção
A limpeza final e de manutenção do produto deverá ser feito com detergentes próprios para pavimento. Deverá ser usado detergente de alta concentração diluído conforme a indicação do fornecedor, e dependendo do grau de sujidade, a diluição do detergente poderá ter de ser bastante reduzida, podendo em alguns casos chegar à proporção de 1/3 (detergente/água).
Esfregar com um pano de limpeza de micro-fibra.
No caso de o produto apresentar muita sujidade, aconselhamos a que a limpeza seja feita manualmente. Em casos muito excecionais da não remoção da sujidade com o método apresentado acima, recomendamos o uso de uma espuma polimérica branca(1) usada apenas com água.
(1) Comercialmente conhecida como esponja mágica.

POLISHED PRODUCTS
The parts of POLISHED finishe series require specialized application and maintenance treatment. The POLISHED finishe are recommended, as well as for wall cladding, also for flooring in residential or light commercial areas that are not subjected to heavy traffic, where anti-slip characteristics are not required. The occasional presence of small inconsistencies or little spots on the surface is to be considered a characteristic of the material and of its unique production process. If the product is laid in direct contact with external environments, it is recommended to use protective solutions to reduce the formation of scratches.
Glue and Mortar
Preferably use mortars for grouting of color identical to the color of the product, and according to its specification - stoneware.
Application and first cleaning
When applying it, you should take the utmost care in removing the mortars used for grouting. Cleaning should be done while the mortars of the joints are still damp, with a cloth or a wet sponge, avoiding the use of abrasive detergents that could damage the pieces.
If the tiles have excess dry waterproofing material, the best way to remove it is by rubbing with paper or a clean and dry cloth. This cleaning can be carried out manually or using a suitable mono-spatula.

It is advisable to carry out this cleaning without any type of abrasive or contaminating materials. Any cleaning with liquid products can potentiate the reduction of effectiveness of the repelling and protective treatment intended with the waterproofing application.
Maintenance
The final cleaning and maintenance of the product should be done with suitable detergents for floors. High concentration detergent diluted according to the supplier's indication should be used, and depending on the degree of soiling it may be necessary to significantly reduce the dilution of the detergent and in some cases up to the proportion of 1/3 (detergent/water).
Rub with a microfiber cleaning cloth.
If the product is very dirty, we advise you to clean it manually.
In very exceptional cases where dirt is not removed with the method presented above, we recommend the use of a white polymer foam (1) used only with water.
(1) Commercially known as magic sponge.

PRODUITS POLIS
Les pièces des séries à finition POLI nécessitent un traitement d'application et d'entretien spécialisé. En plus des revêtements, la finition POLI est également recommandée pour les sols dans les environnements résidentiels ou commerciaux légers peu soumis à des contraintes élevées, pour lesquels aucune prestation antidérapante n'est requise. La présence sporadique de petites irrégularités ou de points à la surface doit être considérée comme une caractéristique du matériau et de sa fabrication particulière. Si le produit est placé en contact direct avec l'extérieur, il est conseillé d'utiliser des solutions de protection afin d'éviter la formation de rayures. Dans les zones à passage de charges lourdes concentrées, l'utilisation de produits d'épaisseur réduite n'est pas recommandée.
Colle et mortier
Utilisez des mortiers pour le jointoiment, de préférence de couleur identique à celle du produit, et selon les spécifications du produit - grès.
Application et premier nettoyage
Lors de son application, vous devez prendre le plus grand soin à enlever les mortiers utilisés pour le jointoiment. Le nettoyage doit être effectué alors que les mortiers du joint sont encore humides, avec un chiffon ou une éponge humide, en évitant l'utilisation de détergents abrasifs qui pourraient endommager les pièces.
Si les pièces ont un excédent sec d'imperméabilisant, la meilleure façon de l'enlever est de frotter avec un papier ou un chiffon propre et sec. Ce nettoyage peut être réalisé manuellement ou en utilisant une mono-spatule appropriée.
Il est conseillé d'effectuer ce nettoyage sans aucun type de matériaux abrasifs ou contaminants. Un éventuel nettoyage avec des produits liquides peut réduire l'efficacité du traitement répulsif et protecteur escompté avec l'application d'imperméabilisation.
Entretien
Le nettoyage final et l'entretien du produit doivent être effectués avec des détergents adaptés aux sols. Il est nécessaire d'utiliser des détergents à haute concentration dilués selon les instructions du fournisseur et, en fonction du degré de salissure, il peut être nécessaire de réduire considérablement la dilution du détergent et dans certains cas jusqu'à la proportion de 1/3 (détergent/eau).
Frottez avec un chiffon de nettoyage en microfibre.
Si le produit est très sale, nous vous conseillons de le nettoyer manuellement.
Dans des cas très exceptionnels où la saleté n'est pas éliminée avec la méthode présentée ci-dessus, nous recommandons l'utilisation d'une mousse polymère blanche (1) utilisée uniquement avec de l'eau.
(1) Commercialement appelée éponge magique.

POLIERTE PRODUKTE
Die Serien Reihen mit POLIERTER Fertigstellung erfordern eine spezielle Anwendung und Wartung. Die POLIERTEN Oberflächen werden nicht nur für Wandverkleidungen empfohlen, sondern auch für Böden in Wohn- bzw. Gewerbebereichen, die keiner hohen Belastung ausgesetzt sind und bei denen keine rutschhemmende Wirkung erforderlich ist. Das sporadischeVorhandensein von kleinen Unebenheiten oder Punkten auf der Oberfläche ist als ein Merkmal von Material und besondererVerarbeitung zu betrachten. Wird das Produkt in direkten Kontakt mit der Außenseite gebracht, wird empfohlen, Schutzlösungen zu verwenden, um die Bildung von Kratzern zu vermeiden. In Bereichen, die schwerer Belastung ausgesetzt sind, ist die Verwendung von Produkten mit reduzierter Stärke nicht empfehlenswert.
Klebstoff und Mörtel
Verwenden Sie Betumenmasse, vorzugsweise mit einer Farbe, die mit der Farbe des Produkts identisch ist, und gemäß der Produktspezifikation - Steinzeug.
Anwendung und erste Reinigung
Sie sollten beim Entfernen des zur Ausfugung verwendeten Mörtels vorsichtig vorgehen. Die Reinigung sollte durchgeführt werden, solange der Fugenmörtel noch feucht ist. Verwenden Sie dazu ein feuchtes Tuch oder einen Schwamm und vermeiden Sie kratzenden oder scheuernden Mittel, die die Teile beschädigen könnten.
Wenn die Teile einen trockenen Überschuss an Abdichtung aufweisen, entfernen Sie sie am besten mit einem sauberen, trockenen Papiertuch oder einem Stofftuch. Diese Reinigung kann entweder manuell oder mit einem geeigneten Spatel erfolgen.
Wir empfehlen, bei dieser Reinigung keine Schleifmittel oder kontaminierenden Materialien zu verwenden. Wenn für die Reinigung flüssige Produkte verwendet werden, kann dies dazu führen, dass die gewünschte Wirksamkeit der abweisenden und schützenden Behandlung mit der wasserfesten Anwendung verringert wird.
Wartung
Die finale Reinigung und Pflege des Produkts muss mit für Fußböden geeigneten Reinigungsmitteln erfolgen. Es sollte ein hochkonzentriertes Reinigungsmittel verwendet werden, das gemäß den Anweisungen des Lieferanten verdünnt werden soll. Je nach Verschmutzungsgrad muss die Verdünnung des Waschmittels möglicherweise erheblich reduziert werden, in einigen Fällen mit einem Anteil von 1/3

(Reinigungsmittel / Wasser).
Mit einem Mikrofaser-Reinigungstuch einreiben.
Wenn das Produkt sehr schmutzig ist, empfehlen wir, es manuell zu reinigen.
In Ausnahmefällen, in denen mit der oben beschriebenen Methode der Schmutz nicht entfernt werden kann, empfehlen wir die Verwendung eines weißen Polymerschums (1), der nur mit Wasser verwendet wird.
(1) Im Handel als magischer Schwamm bekannt.

ПОЛИРОВАННЫЕ ИЗДЕЛИЯ
Детали с полированной поверхностью требуют специального применения и ухода. ПОЛИРОВАННАЯ поверхность, помимо того, что она идеально подходит для настенной плитки, также подходит и для напольной плитки в жилых или коммерческих помещениях с небольшой интенсивностью движения, не подверженных интенсивному использованию, где не требуются противоскользящая поверхность на полу. Незначительное присутствие мелких неровностей или пятен на поверхности следует рассматривать как характеристику материала и его особую отделку. Если продукт находится в прямом контакте с внешней средой, рекомендуется использовать защитные растворы, чтобы снизить вероятность возникновения микротрещин. Монтажник обязан всегда обеспечивать защиту керамических изделий, их чистоту перед доставкой их заказчику, используя подходящие защитные материалы (например, панели из ДСП, листы картона и т. д.).
Клей и цементный раствор
Использовать раствор для затирки швов желательно идентичному цвету материала и согласно спецификации продукции - керамограниту.
Нанесение материала и первая очистка
При его нанесении следует проявлять особую осторожность при удалении раствора, использованного для затирки швов. Очистку следует проводить влажной тканью или губкой, пока раствор для швов остается влажным, избегая использования абразивных моющих средств, которые могут повредить поверхность материала.
Если на плитках обнаружен сухой излишек гидроизоляционного материала, то лучший способ удалить его - протереть чистой сухой бумагой или тканью. Это можно произвести вручную или с помощью подходящего моно шпателя.
Мы рекомендуем проводить эту очистку без использования каких-либо абразивных или загрязняющих средств.
Любая очистка жидкими средствами может снизить эффективность желаемого репеллента и защитной обработки с применением гидроизоляции.
Обслуживание
Окончательную очистку и уход за изделием следует проводить с помощью моющих средств, подходящих для напольных покрытий.
Следует использовать разбавленное моющее средство с высокой концентрацией, согласно указаниям поставщика, и, в зависимости от степени загрязнения, разбавление моющего средства может быть значительно уменьшено, в некоторых случаях достигая пропорции 1/3 (моющее средство/вода).
Протрите поверхность чистой тканью из микрофибры.
Если материал окажется очень загрязненным, то советуем очистить его вручную. В особо исключительных случаях, когда не удастся удалить грязь описанным выше методом, мы рекомендуем использовать белую полимерную пену (1), применяемую исключительно с водой.
(1) Коммерчески известна как "волшебная" губка.

PRODOTTI LEVIGATI
La finitura LEVIGATI è consigliata, oltre che per rivestimenti, anche per pavimenti in ambienti residenziali o commerciale leggero non sottoposti ad elevate sollecitazioni, ove non siano richieste prestazioni antiscivolo. La presenza sporadica di piccole disuniformità o di puntini sulla superficie è da ritenersi come caratteristica del materiale e della particolare lavorazione. Qualora il prodotto sia posto a diretto contatto con l'esterno, si consiglia di utilizzare soluzioni protettive al fine di prevenire la formazione di graffi. E' responsabilità del posatore provvedere sempre alla protezione della piastrellatura finita e pulita, prima della consegna al committente, tramite appositi materiali protettivi (es. pannelli in truciolare, fogli di cartone, ecc.).
Colla e Malta
Utilizzare malta per stuccatura, preferibilmente dello stesso colore del prodotto e secondo le specifiche del prodotto - gres.
Applicazione e prima pulizia
Nella sua applicazione, è necessario prestare la massima attenzione a rimuovere la malta utilizzata per la stuccatura. La pulizia deve essere effettuata quando le malte delle fughe sono ancora umide, con un panno umido o una spugna, evitando l'uso di detergenti abrasivi che potrebbero danneggiare i pezzi.
Se le piastrelle hanno un eccesso di impermeabilizzante secco, il modo migliore per rimuoverlo è strofinare con carta o con un panno pulito e asciutto. Questa pulizia può essere effettuata manualmente o utilizzando un'apposita monospatola.
Si consiglia di effettuare questa pulizia senza alcun tipo di materiale abrasivo o contaminante.
Un'eventuale pulizia con prodotti liquidi può ridurre l'efficacia del trattamento repellente e protettivo previsto dall'applicazione dell'impermeabilizzazione.
Manutenzione
La pulizia finale e la manutenzione del prodotto devono essere effettuate con detergenti per pavimenti. È necessario utilizzare detergenti ad alta concentrazione diluiti secondo le indicazioni del fornitore e, a seconda del grado di sporcizia, potrebbe essere necessario ridurre notevolmente la diluizione del detergente e in alcuni casi fino a 1/3 (detergente/acqua).
Strofinare con un panno per la pulizia in microfibra.
Se il prodotto è molto sporco, si consiglia di pulirlo manualmente.
In casi del tutto eccezionali di mancata rimozione dello sporco con il metodo sopra presentato, si consiglia l'uso di una schiuma polimerica bianca (1) utilizzata solo con acqua.
(1) Commercialmente conosciuta come spugna magica.

10

CICLO DE VIDA
Os impactos ambientais dos nossos produtos distribuem-se ao longo do seu ciclo de vida, nas etapas extração, transporte de matérias-primas, produção, distribuição, uso e fim de vida. A Love Tiles minimiza estes impactos ambientais, através de boas práticas de gestão ambiental. No uso e fim de vida, apelamos à vossa melhor gestão, privilegiando a reutilização ou a reciclagem numa perspetiva de economia circular.

LIFE CYCLE
The environmental impacts of our products are distributed through their life cycle complying extraction, raw materials transport, production, distribution, use and end of life. Love Tiles minimize these impacts through good practices of environmental management. At the end of the product's life cycle, Love Tiles asks for your best management, favoring the reuse or recycling in a perspective of a circular economy.

CYCLE DE VIE
Les impacts environnementaux de nos produits sont distribués tout au long de leur cycle de vie, dans les phases d'extraction, de transport des matières premières, de production, de distribution, d'utilisation et de fin de vie. Chez Love Tiles on minimise ces impacts environnementaux grâce aux bonnes pratiques de gestion de l'environnement. Dans l'utilisation et la fin de vie, on appelle à votre meilleure gestion en privilégiant la réutilisation ou le recyclage dans une perspective d'économie circulaire.

LEBENSZYKLUS
Die Umweltbelastung unserer Produkte prägt jede Phase ihres Lebenszyklus – die Gewinnung und das Transport der Rohstoffe, die Produktion, die Lieferung, der Gebrauch, die Entsorgung. Love Tiles verniedlicht durch gute Programme des Umweltmanagements die Umweltbelastung. In der Phase des Gebrauchs und der Entsorgung bitten wir Sie um eine bevorzugte Auswahl von Weiterverwenden oder Recycling.

ЖИЗНЕННЫЙ ЦИКЛ
Экологические воздействия влияют на нашу продукцию на протяжении всего жизненного цикла, на этапах добычи, транспортировки сырья, производства, дистрибуции, использования и окончания срока службы. Love Tiles минимизирует данные экологические воздействия и последствия благодаря хорошей практике управления окружающей средой. В использовании продукции мы призываем вас следить за окружающей средой, отдавая предпочтение повторному использованию материала или его переработке.

CICLO DI VITA
L'impatto ambientale dei nostri prodotti si distribuisce durante il loro ciclo di vita, nelle tappe di estrazione e trasporto delle materie prime, produzione, distribuzione, uso e smaltimento. La Love Tiles minimizza tutto ciò, attraverso buone pratiche di gestione ambientale. Nell'uso e nello smaltimento, ci appelliamo alla vostra gestione, perché privilegiate il riuso o il riciclaggio in una prospettiva di economia circolare.

ANTIDERRAPANTE

A aplicação de material com características antiderrapantes tem como objetivo reduzir o risco de escorregamento numa superfície utilizada por pedestres. Alguns dos métodos de ensaio que permitem a avaliação do grau de escorregamento são:

ANEXO A – TESTE DA RAMPA DESCALÇO

Teste utilizado para avaliar superfícies húmidas onde se circula habitualmente com pés descalços (duches, piscinas, balneários, etc.). O teste é realizado numa plataforma inclinável, onde o material é continuamente exposto a água. O operador caminha descalço para a frente e para trás sobre o material de teste, enquanto o ângulo de inclinação vai aumentando. Quando o limite seguro da caminhada é atingido, ocorre o escorregamento do operador e o ângulo obtido é classificado conforme a tabela abaixo.

ANEXO B – TESTE DA RAMPA CALÇADO

Teste utilizado para avaliar superfícies húmidas onde se circula habitualmente com pés calçados. O teste é realizado também na rampa de escorregamento, onde o material é previamente impregnado com óleo. O operador caminha calçado para a frente e para trás sobre o material de teste, enquanto o ângulo de inclinação vai aumentando. Quando o limite seguro da caminhada é atingido, ocorre o escorregamento do operador e o ângulo obtido é classificado conforme a tabela abaixo.

ANEXO C – TESTE DO PÊNDULO

O teste do pêndulo é um método que mede a força de atrito entre uma borracha deslizante e a superfície de teste. Após balançar o braço do pêndulo e a borracha entrar em contacto com a amostra, vai existir redução do movimento, e o valor do teste ficará representado na escala graduada do equipamento. O valor do teste do pêndulo é utilizado para expressar o grau de deslizamento do material em teste. A borracha a utilizar depende se queremos simular o pé descalço (borracha 57) ou o pé calçado (borracha 96) e o teste pode ser realizado a húmido ou a seco. No entanto, o teste mais habitual é com a borracha 96 a húmido.

ANTI-SLIP

The application of material with anti-slip characteristics aims to reduce the risk of slipping on a surface used by pedestrians. Some of the test methods that allow the assessment of the degree of slippage are:

ANNEX A – BAREFOOT RAMP TEST

Test used to assess damp surfaces where one usually walks barefoot (showers, swimming pools, changing rooms, etc.). The test is carried out on a tilting platform, where the material is continuously exposed to water. The operator walks barefoot back and forth on the test material, while the angle of inclination increases. When the safe walking limit is reached, the operator slips and the angle obtained is classified according to the table below.

ANNEX B – SHOD FOOT RAMP TEST

Test used to assess surfaces on which footwear is normally worn. The test is also carried out on the slip ramp, where the material is previously impregnated with oil. The operator walks back and forth on the test material with shoes on, while the inclination angle increases. When the safe walking limit is reached, the operator slips and the angle obtained is classified according to the table below

ANNEX C – PENDULUM TEST

The pendulum test is a method that measures the friction force between a sliding rubber and the test surface. After swinging the pendulum arm and the rubber coming into contact with the sample, there will be a reduction in movement and the test value will be represented on the graduated scale of the equipment. The pendulum test value is used to express the degree of slippage of the material under testing. The rubber to be used depends on whether we want to simulate the bare foot (rubber 57) or the shod foot (rubber 96) and the test can be carried out wet or dry. However, the most common test is with rubber 96 wet.

ANTIDÉRAPANT

La pose de matériaux aux caractéristiques antidérapantes vise à réduire le risque de glissement sur une surface utilisée par les piétons. Voici certains des méthodes d'essai permettant d'évaluer le degré de glissement :

ANNEXE A – TEST DE LA RAMPE PIEDS NUS

Test utilisé pour évaluer les surfaces humides où l'on marche habituellement pieds nus (douches, piscines, vestiaires, etc.). Le test est réalisé sur une plateforme inclinable, où le matériel est continuellement exposé à l'eau. L'opérateur marche pieds nus d'avant en arrière sur le matériel d'essai, tandis que l'angle d'inclinaison augmente. Lorsque la limite de sécurité de la marche est atteinte, l'opérateur glisse et l'angle obtenu est classé selon le tableau ci-dessous.

ANNEXE B – TEST DE LA RAMPE CHAUSSÉ

Test utilisé pour évaluer les surfaces où l'on marche habituellement chaussé. Le test est également réalisé sur la rampe de glissement, où le matériel est imprégné d'huile. L'opérateur marche chaussé d'avant en arrière sur le matériel d'essai, tandis que l'angle d'inclinaison augmente. Lorsque la limite de sécurité de la marche est atteinte, l'opérateur glisse et l'angle obtenu est classé selon le tableau ci-dessous.

ANNEXE C – TEST DU PENDULE

Le test du pendule est une méthode qui mesure la force de friction entre un caoutchouc glissant et la surface d'essai. Après avoir balancé le bras du pendule et que le caoutchouc entre en contact avec l'échantillon, il y aura une réduction du mouvement, et la valeur du test sera représentée sur l'échelle graduée de l'équipement. La valeur du test du pendule est utilisée pour exprimer le degré de glissement du matériel en test. Le caoutchouc à utiliser dépend si l'on veut simuler le pied nu (caoutchouc 57) ou le pied chaussé (caoutchouc 96) et le test peut être réalisé à humide ou à sec. Cependant, le test le plus habituel est avec le caoutchouc 96 à humide.

RUTSCHFEST

Die Verwendung von Materialien mit rutschfesten Eigenschaften zielt darauf ab, die Rutschgefahr auf einer von Personen benutzten Oberfläche zu verringern. Einige der Prüfmethoden, die die Bewertung des Rutschgrads ermöglichen, sind:

ANHANG A – RAMPENTEST BARFUSS

Test zur Bewertung von feuchten Oberflächen, auf denen man normalerweise barfuß läuft (Duschen, Schwimmbäder, Umkleieräume usw.). Der Test wird auf einer kippbaren Plattform durchgeführt, auf der das Material ständig Wasser ausgesetzt ist. Die Testperson läuft barfuß auf dem Prüfmaterial auf und ab, während der Neigungswinkel zunimmt. Wenn die sichere Grenze des Gehens erreicht ist, rutscht die Testperson aus und der gemessene Winkel wird gemäß der folgenden Tabelle klassifiziert.

ANHANG B – RAMPENTEST MIT SCHUHEN

Test zur Bewertung von Oberflächen, auf denen normalerweise Schuhe getragen werden. Der Test wird ebenfalls auf der Rutschrampe durchgeführt, wobei das Material zuvor mit Öl imprägniert wird. Die Testperson läuft in Schuhen auf dem Prüfmaterial auf und ab, während der Neigungswinkel zunimmt. Wenn die sichere Grenze des Gehens erreicht ist, rutscht die Testperson aus und der gemessene Winkel wird gemäß der folgenden Tabelle klassifiziert.

ANHANG C – PENDELTEST

Der Pendeltest ist eine Methode zur Messung der Reibungskraft zwischen einem gleitenden Gummi und der Testoberfläche. Nach dem Schwingen des Pendelarms und dem Kontakt des Gummis mit der Probe kommt es zu einer Verringerung der Bewegung, und der Prüfwert wird auf der Skala des Geräts dargestellt. Der Pendelprüfwert wird verwendet, um den Grad des Gleitens des zu prüfenden Materials auszudrücken. Welcher Gummi verwendet wird, hängt davon ab, ob man einen nackten Fuß (Gummi 57) oder einen Schuh (Gummi 96) simulieren möchte. Der Test kann nass oder trocken durchgeführt werden. Der gebräuchlichste Test ist jedoch mit dem Gummi 96 und nass.

ПРОТИВОСКОЛЬЗЯЩИЙ МАТЕРИАЛ

Применение материала с противоскользящими характеристиками направлено на снижение риска поскользнуться на поверхности, используемой пешеходами. Некоторые из методов испытаний, позволяющих оценить степень скольжения:

ПРИЛОЖЕНИЕ А – ИСПЫТАНИЕ НА ПАНДУСЕ ПРИ ХОДЬБЕ БОСИКОМ

Тест, используемый для оценки влажных поверхностей, по которым люди обычно ходят босиком (душевые, бассейны, раздевалки и т. д.). Испытание проводится на наклонной платформе, где материал постоянно подвергается воздействию воды. Оператор ходит босиком взад-вперед по исследуемой поверхности, при этом угол наклона увеличивается. При достижении безопасного предела ходьбы оператор соскальзывает, и полученный угол классифицируется в соответствии с таблицей ниже.

ПРИЛОЖЕНИЕ В – ИСПЫТАНИЕ НА ПАНДУСЕ ПРИ ХОДЬБЕ В ОБУВИ

Тест, используемый для оценки поверхностей, по которым люди обычно ходят в обуви. Испытание также проводят на слайд-рампе, где материал предварительно пропитывают маслом. Оператор ходит в обуви взад-вперед по исследуемой поверхности, при этом угол наклона увеличивается. При достижении безопасного предела ходьбы оператор соскальзывает, и полученный угол классифицируется в соответствии с таблицей ниже.

ПРИЛОЖЕНИЕ С – МАЯТНИКОВОЕ ИСПЫТАНИЕ

Маятниковое испытание — это метод измерения силы трения между скользящим резиновым ползун и испытуемой поверхностью. После поворота маятникового рычага и контакта резины с образцом материала движение уменьшится, и значение испытания будет отображено на градуированной шкале оборудования. Значение маятникового испытания используется для выражения степени скольжения испытуемого материала. Используемый резиновый ползун зависит от того, хотим ли мы имитировать босую ногу (резина 57) или обутую ногу (резина 96), и испытание можно проводить при влажном или сухом состоянии. Однако чаще всего тест проводится с влажной резиной 96.

ANTISCIVOLO

L'applicazione di materiale con caratteristiche antiscivolo ha lo scopo di ridurre il rischio di scivolamento su una superficie utilizzata dai pedoni. Alcuni dei metodi di prova che permettono la valutazione del grado di scivolamento sono:

ALLEGATO A – TEST DELLA RAMPA A PIEDI NUDI

Test utilizzato per valutare le superfici umide dove si cammina abitualmente a piedi nudi (docce, piscine, spogliatoi, ecc.). Il test viene eseguito su una piattaforma inclinabile, dove il materiale è continuamente esposto all'acqua. L'operatore cammina a piedi nudi avanti e indietro sul materiale di prova, mentre l'angolo di inclinazione aumenta. Al raggiungimento del limite di sicurezza della camminata, si verifica lo scivolamento dell'operatore e l'angolo ottenuto viene classificato secondo la tabella sottostante.

ALLEGATO B – TEST DELLA RAMPA CON CALZATURE

Test utilizzato per valutare le superfici su cui si cammina abitualmente con scarpe. Anche questo test viene eseguito sulla rampa di scivolamento, dove il materiale è precedentemente impregnato di olio. L'operatore cammina avanti e indietro sul materiale di prova con le scarpe, mentre l'angolo di inclinazione aumenta. Al raggiungimento del limite di sicurezza della camminata, si verifica lo scivolamento dell'operatore e l'angolo ottenuto viene classificato secondo la tabella sottostante.

ALLEGATO C – TEST DEL PENDOLO

Il test del pendolo è un metodo che misura la forza di attrito tra una gomma scivolante e la superficie di prova. Dopo aver fatto oscillare il braccio del pendolo e aver fatto entrare la gomma in contatto con il campione, si avrà una riduzione del movimento e il valore del test sarà rappresentato sulla scala graduata dell'apparecchiatura. Il valore del test del pendolo viene utilizzato per esprimere il grado di slittamento del materiale in prova. Quale gomma utilizzare dipende dal fatto che si voglia simulare il piede nudo (gomma 57) o il piede calzato (gomma 96) e il test può essere effettuato sia a secco che a umido. Tuttavia, il test più comune è quello con la gomma 96 a umido.

DÊ LARGAS À SUA IMAGINAÇÃO

Com o nosso **3D Tool** crie ambientes de raiz através do espaço de modelação, personalize objetos, peça orçamentos e guarde todas as suas criações.
Comece a criar agora.

SPARK YOUR IMAGINATION

With our **3D Tool**, create environments from scratch through the modelling space, customise objects, request quotations and save all your creations.
Start creating now.

LAISSEZ LIBRE COURS À VOTRE IMAGINATION

Avec notre **3D Tool**, vous pouvez créer de nouveaux environnements à partir de zéro grâce à l'espace de modélisation, personnaliser des objets, demander des devis et sauvegarder toutes vos créations.
Commencez à créer dès maintenant.

LASSEN SIE IHRER FANTASIE FREIEN LAUF

Mit unserem **3D Tool** können Sie von Grund auf neue Räume im Modellierungsbereich gestalten und erstellen, Objekte individuell personalisieren, Kostenvorschläge anfordern und alle Ihre Kreationen speichern.
Beginnen Sie jetzt mit dem Gestalten.

ДАЙТЕ СВОБОДУ ВАШЕМУ ВООБРАЖЕНИЮ

оздавайте с нуля свою окружающую среду с помощью нашего инструмента **3D Tool**, используя пространство для моделирования, настраивайте объекты, запрашивайте расценки и сохраняйте все свои творения.
Начните созидать прямо сейчас.

ACCENDI LA TUA IMMAGINAZIONE

Con il nostro **3D Tool**, crea ambienti da zero attraverso lo spazio di modellazione, personalizza gli oggetti, richiedi preventivi e salva tutte le tue creazioni.
Inizia subito a creare.

UNA O SONHO À REALIDADE

Vá a **www.lovetiles.com**, aceda a **Love AR**, tire uma foto com o seu telemóvel e teste a aplicação dos nossos pavimentos, em tempo real e com a simulação dos nossos produtos à escala real.
Entre na nossa aplicação e simule este piso na sua casa!

TURN YOUR DREAMS INTO REALITY

Go to **www.lovetiles.com**, access **Love AR**, take a picture with your mobile phone and test the application of our floors, in real time and with the full-scale simulation of our products.
Enter our application and simulate the floor of your house!

UNISSEZ LE RÊVE À LA RÉALITÉ

Rendez-vous sur **www.lovetiles.com**, accédez à **Love AR**, prenez une photo avec votre téléphone portable et testez l'application de nos revêtements de sol en temps réel, avec une simulation de nos produits à l'échelle réelle.
Entrez dans notre application et simulez ce revêtement de sol dans votre maison!

VEREINEN SIE TRAUM UND REALITÄT

Besuchen Sie **www.lovetiles.com**, öffnen Sie **Love AR**, machen Sie ein Foto mit Ihrem Smartphone und testen Sie die Anwendung unserer Bodenbeläge in Echtzeit und mit einer realitätsgetreuen Simulation unserer Produkte in Originalgröße.
Starten Sie unsere App und simulieren Sie diesen Bodenbelag direkt in Ihrem Zuhause!

ОБЪЕДИНИ МЕЧТУ С РЕАЛЬНОСТЬЮ

Посетите сайт **www.lovetiles.com**, получите доступ к Love AR, сделайте снимок на свой телефон и протестируйте укладку нашего напольного покрытия в режиме реального времени с помощью полномасштабной симуляции.
Используйте наше приложение и смоделируйте укладку этого материала в своём доме!

TRASFORMA I TUOI SOGNI IN REALTÀ

Vai su **www.lovetiles.com**, accedi a **Love AR**, scatta una foto con il tuo cellulare e prova l'applicazione dei nostri pavimenti, in tempo reale e con la simulazione in scala reale dei nostri prodotti.
Entra nella nostra applicazione e simula il pavimento della tua casa!

Condições Gerais de Venda

1 - Aplicabilidade das Condições

1.1. As condições gerais em seguida elencadas e especificadas - de ora em diante denominadas “CONDIÇÕES” -, constituem parte integrante do contrato de compra e venda de mosaicos e outros produtos cerâmicos - de ora em diante designados como o “PRODUTO” ou os “PRODUTOS” - fabricados pela Love Tiles - Gres Panaria Portugal, S.A., também designado como o “FABRICANTE”.

1.2. Salvo casos específicos ou excepcionais, em que a aplicação destas condições seja expressamente alterada através de acordo escrito e assinado pelo FABRICANTE, elas representam as condições exclusivas aplicadas a essa venda. Se uma ou mais partes das presentes CONDIÇÕES ou contratos, individualmente considerados, dos quais elas façam parte, forem alguma forma julgadas nulas, inválidas ou inaplicáveis por razões de força maior, as CONDIÇÕES gerais ou particulares permanecerão válidas no seu conjunto, sendo que as condições inválidas serão substituídas por novas disposições que reproduzirão, tanto quanto possível, a intenção original das partes.

1.3. As vendas efetuadas pela nossa empresa são regidas pela Convenção das Nações Unidas sobre Contratos para a Venda Internacional de Mercadorias (CISG — Viena, 1980). As partes acordam que todas as questões relativas à formação do contrato, cumprimento, falta de conformidade, garantias, responsabilidades e direitos das partes serão interpretadas de acordo com a CISG. O comprador compromete-se a examinar as mercadorias e a notificar eventuais falhas de conformidade nos prazos previstos nos artigos 38.º e 39.º da Convenção, salvo estipulação contratual diversa.

2 - Execução do Contrato de Venda - Entrega dos Produtos

2.1. O contrato é celebrado quando a parte proponente ou o comprador tiver conhecimento da aceitação escrita do mesmo pela contraparte.

2.2. Uma encomenda que não tiver sido confirmada por escrito não pode em nenhuma circunstância ser considerada como aceite, excepto se tiver sido executada pelo FABRICANTE através do envio ou da entrega dos PRODUTOS. A entrega parcial dos PRODUTOS encomendados não implica a aceitação da totalidade da encomenda, mas apenas da parte dos PRODUTOS que tenham sido efetivamente entregues.

2.3. Excepto se for, prévia e expressamente diversamente acordado, a entrega dos PRODUTOS será efectuada exclusivamente no território de Portugal Continental e na condição de que seja possível e permitido o acesso ao local de entrega de veículos pesados com semi-reboque de 24 (vinte e quatro) toneladas de peso bruto.

2.4. Excepto se o contrário for expressamente acordado por escrito, a entrega dos PRODUTOS apenas será efectuada em obra se a encomenda a entregar for superior a 100m² (cem metros quadrados).

2.5. Salvo acordo expresso em contrário, todas as datas que forem indicadas para efeitos de entrega, serão consideradas como datas aproximadas.

3 - Características dos Produtos - Garantia - Reclamações

3.1. Os PRODUTOS fabricados pela Love Tiles - Gres Panaria Portugal, S.A. são produzidos em conformidade com as normas europeias aplicáveis. O FABRICANTE vende preferencialmente a revendedores profissionais, sendo estes os responsáveis por prestarem informações técnicas correctas e adequadas aos utilizadores finais ou aos retalhistas.

A classificação dos PRODUTOS é indicada pelo FABRICANTE no material publicitário e/ou nas tabelas de preços. Em consequência, o comprador deverá usar os PRODUTOS em conformidade com as especificações do FABRICANTE.

Para facilitar a sugestão de uso e adaptar a especificação standard à produção específica do FABRICANTE, sobre todos os produtos, listas de preços ou catálogos existem símbolos específicos que indicam a utilização aconselhada para cada produto por parte do FABRICANTE.

3.2. As diferenças de tonalidade ou crominância eventualmente constáveis não decorrem de defeitos do PRODUTO, sendo sim uma característica específica do material cerâmico que foi submetido a cozedura a altas temperaturas. A característica especial de “resistência à congelação” apenas se aplica aos produtos que o FABRICANTE tenha especificamente garantido para esse efeito através de uma indicação expressa no seu material publicitário e/ou nas tabelas de preços. No caso de inexistência desta indicação, os produtos serão considerados única e exclusivamente para utilização em interior ou, em qualquer caso, para utilização em locais que não estejam expostos a elementos atmosféricos que alterem as características de resistência ou aparência original do PRODUTO (ex.: precipitação atmosférica, sol, humidade, temperaturas baixas, etc.).

3.3. Os mosaicos com as faces polidas podem alterar o seu aspecto quando utilizados no pavimento de divisões que tenham acesso a partir do exterior, ou divisões onde se preveja intensa circulação pedonal. Os mosaicos polidos podem também ser escorregadios, especialmente quando estiverem molhados ou sob o efeito de humidade. Atento a este motivo o FABRICANTE desaconselha a utilização destes PRODUTOS em locais públicos. Para os locais de circulação intensa de pessoas, o comprador apenas deverá adquirir PRODUTOS classificados pelo FABRICANTE como “PEI V” ou “Grés Porcelânico Toda-a-Massa”, em particular os PRODUTOS que o FABRICANTE recomendar especificamente para utilização em locais públicos.

3.4. As apresentações dos PRODUTOS em folhetos ou em qualquer outro material promocional do FABRICANTE são meramente ilustrativos e não representam necessariamente o resultado final estético decorrente da instalação desse produto específico.

3.5. O FABRICANTE garante a boa qualidade e a ausência de defeitos nos PRODUTOS fornecidos.

A garantia não se aplica aos PRODUTOS classificados pelo FABRICANTE como inferiores à qualidade de 1ª escolha, ou aos stocks de produtos que tenham sido descontinuados, quando forem vendidos a granel ou indicados como lote especial.

3.6. O FABRICANTE não é responsável por quaisquer defeitos e/ou anomalias existentes nos PRODUTOS que não derivem das especificações técnicas dos mesmos, mas antes decorram de uma utilização inadequadas dos PRODUTOS por parte dos adquirentes e/ou de terceiros que actuem em seu nome. Em particular, o FABRICANTE não aceita quaisquer reclamações ou litígios ligados às situações anteriormente descritas.

3.7. As reclamações decorrentes da existência de defeitos patentes ou ocultos terão de ser efectuados por escrito ao FABRICANTE pelo comprador no prazo de 60 dias a contar da data de entrega das mercadorias. A responsabilidade do Fabricante por defeitos inerentes aos produtos entregues ao comprador fica expressamente limitado ao prazo de 2 anos a contar da data de recepção do bem pelo comprador.

3.8. Em geral, a garantia apenas se aplica aos defeitos detectados em produtos que ainda não foram aplicados. Relativamente aos defeitos detectados após os PRODUTOS terem sido aplicados, a garantia apenas pode aplicar-se se o FABRICANTE tiver confirmado que a colocação do PRODUTO foi efectuada em conformidade com as melhores regras da actividade (DIN 18352), bem como de acordo com os procedimentos descritos no manual de aplicação e manutenção do FABRICANTE.

3.9. A garantia concedida pelo FABRICANTE limita-se à substituição dos produtos defeituosos por outros produtos do mesmo tipo sem defeito, acrescida das despesas de transporte. É expressamente excluído o reembolso de quaisquer outros custos e/ou despesas e em particular os custos de demolição e recolocação. Em qualquer caso, a garantia do FABRICANTE não pode ultrapassar em cinco vezes o valor do material reclamado, até um valor máximo de 10.000 Euros.

3.10. O FABRICANTE não é responsável por quaisquer reclamações devidas a uma classificação de materiais cerâmicos efectuada por organismos de certificação e controlo e diferentes dos europeus indicados no artigo 3.1, com base em especificações técnicas que não correspondam às indicadas pelo FABRICANTE. Qualquer eventual análise técnica especializada solicitada pelo comprador será baseada na correspondência dos materiais vendidos com as características técnicas indicadas pelo FABRICANTE, nesse momento em vigor em Portugal.

4 - Preços e Condições de Pagamento

4.1. Os preços de venda dos PRODUTOS são os indicados na tabela de preços do FABRICANTE vigente à data de confirmação da encomenda. Para contratos de venda com entregas separadas, o preço será o constante da tabela de preços em vigor à data de cada uma das entregas, excepto se as partes contraentes dispuserem por escrito em sentido diverso.

Para os PRODUTOS destinados a mercados estrangeiros o preço será calculado, por indicação do FABRICANTE, na moeda estrangeira do país de destino ou em Euros.

4.2. Excepto se o contrário for expressamente acordado, os pagamentos serão efectuados através de transferência bancária, no prazo de 30 dias a contar da data da factura. Todas as despesas bancárias e de transferência correm por conta do comprador. No caso de atraso na realização do pagamento, o FABRICANTE terá o direito, sem necessidade de aviso prévio ao comprador, de aplicar uma taxa de juros de mora e punitivos equivalente à taxa EURIBOR a 6 meses acrescida de 5%, sem prejuízo do direito ao ressarcimento de quaisquer outros prejuízos.

5 - Agentes do Fabricante

5.1. Os agentes do FABRICANTE promovem a venda dos PRODUTOS e não estão autorizados a agir em nome e por conta do FABRICANTE, excepto no caso de obterem autorização específica expressa para o efeito.

5.2. As encomendas recebidas pelos agentes não vinculam o FABRICANTE e deverão, portanto, ser expressamente aceites por escrito pelo próprio FABRICANTE.

6 – Reserva de Propriedade

6.1. É acordado entre as partes que a venda dos PRODUTOS seja efectuada com reserva de propriedade por parte do FABRICANTE até que o pagamento integral do preço acordado esteja integralmente saldado pelo comprador. No entanto, o risco de perda das mercadorias é transferido para o comprador no momento da entrega dos PRODUTOS.

6.2. No caso de vendas para países estrangeiros, quando as mercadorias são vendidas e entregues a terceiros no âmbito das actividades comerciais normais do Comprador e a propriedade das mercadorias ainda não tiver sido transferida, o direito de reserva de propriedade do FABRICANTE permanece válido perante terceiros.

6.3. No caso de atrasos no pagamento o FABRICANTE tem o direito, sem necessidade de recorrer a qualquer formalidade, incluindo qualquer aviso prévio ao comprador, a recolher todas as mercadorias sujeitas a reserva de propriedade e, se legalmente consagrado, todos os títulos de crédito perante terceiros, ficando expressamente reservado o direito do FABRICANTE recorrer a todos os meios legais ao seu dispor tendo em vista o ressarcimento dos prejuízos que tiver sofrido ou que vier a sofrer em consequência da conduta inadimplente do Comprador.

7 – Caso de Força Maior

7.1. O FABRICANTE não será responsável perante o comprador por qualquer incumprimento do contrato, incluindo a falta de entrega ou a entrega com atraso do PRODUTO, causada por eventos que estão fora do seu controlo, como por exemplo, a não entrega ou entrega com atraso de materiais por parte de fornecedores, avarias nas instalações, greves, factos da natureza, interrupções no fornecimento de energia eléctrica, suspensão ou dificuldades de transporte.

8 – Legislação Aplicável - Foro Competente

8.1. As partes acordam que qualquer litígio relativo à formação, validade, interpretação ou execução do presente contrato será submetido exclusivamente à jurisdição dos tribunais da sede do vendedor, com renúncia expressa a qualquer outro foro.

General Sales Conditions

1 - Applicability of Conditions

1.1. The general conditions listed and specified below - hereinafter referred to as the “CONDITIONS” - form an integral part of the contract for the purchase and sale of mosaics and other ceramic products - hereinafter referred to as the “PRODUCT” or the “PRODUCTS” - manufactured by Love Tiles - Gres Panaria Portugal, S.A., also referred to as the “MANUFACTURER”.

1.2. Except in specific or exceptional cases, in which the application of these conditions is expressly modified by written agreement and signed by the MANUFACTURER, they represent the exclusive conditions applied to such sale. If one or more parts of these CONDITIONS or contracts, individually considered and of which they form part, are in any way deemed null and void, invalid or unenforceable by reason of force majeure, the general or particular CONDITIONS shall remain valid as a whole and the invalid conditions shall be replaced by new provisions reproducing, as far as possible, the original intention of the parties.

1.3. Sales made by our company are governed by the United Nations Convention on Contracts for the International Sale of Goods (CISG — Vienna, 1980). The parties agree that all matters relating to the formation of the contract, its performance, non-conformity, warranties, liabilities, and the parties’ rights shall be interpreted in accordance with the CISG. The buyer undertakes to examine the goods and to notify any lack of conformity within the time limits set out in Articles 38 and 39 of the Convention, unless otherwise contractually agreed.

2 - Execution of the Sales Contract - Delivery of Products

2.1. The contract shall be signed when the proposing party or the purchaser becomes aware of its written acceptance by the counterpart.

2.2. An order that has not been confirmed in writing cannot under any circumstances be considered as accepted, unless it has been executed by the MANUFACTURER through the shipment or delivery of the PRODUCTS. The partial delivery of the ordered PRODUCTS does not imply acceptance of the entire order, but only of the part concerning the PRODUCTS that have actually been delivered.

2.3. Unless previously and expressly otherwise agreed, the delivery of the PRODUCTS will exclusively be made in the territory of mainland Portugal and on the condition that it is possible and allowed access of heavy vehicles with semi-trailers of 24 (twenty-four) tons of gross weight to the place of delivery.

2.4. Unless otherwise expressly agreed, all dates indicated for delivery purposes shall be considered as approximate dates.

3 - Product Characteristics - Guarantee - Complaints

3.1. The PRODUCTS manufactured by Love Tiles - Gres Panaria Portugal, S.A., are produced in accordance with the applicable European standards. The MANUFACTURER preferably sells to professional resellers, who are responsible for providing correct and appropriate technical information to end users or retailers.

The classification of the PRODUCTS is indicated by the MANUFACTURER in advertising material and/or price lists. Consequently, the buyer must use the PRODUCTS in accordance with the MANUFACTURER's specifications.

To facilitate the suggestion of use and adapt the standard specification to the specific production of the MANUFACTURER, all products, price lists or catalogues contain specific symbols indicating the recommended use for each product by the MANUFACTURER.

3.2. Differences in tonality or chrominance, if any, do not result from defects in the PRODUCT, rather being a specific characteristic of the ceramic material that has been subjected to firing at high temperatures. The special characteristic of “freezing resistance” only applies to products which the MANUFACTURER has specifically guaranteed for that purpose by means of express indication in its advertising material and/ or price lists. In case of absence of this indication, the products will be solely and exclusively considered for indoor use or, in any case, for use in places that are not exposed to atmospheric elements that alter the resistance characteristics or the original look of the PRODUCT (e.g. atmospheric precipitation, sun, humidity, low temperatures, etc.).

3.3. Mosaics with polished faces may change their appearance when used on the floor of rooms that have access from the outside, or rooms where intense pedestrian traffic is expected. Polished tiles can also be slippery, especially when wet or damp. For this reason, the MANUFACTURER advises against the use of these PRODUCTS in public places. For places where people circulate intensively, the buyer should only purchase PRODUCTS classified by the MANUFACTURER as “PEI V” or “Full Body Porcelain Stoneware”, in particular those PRODUCTS that the MANUFACTURER specifically recommends for use in public places.

3.4. The presentations of the PRODUCTS in leaflets or in any other promotional material by the MANUFACTURER are merely illustrative and do not necessarily represent the aesthetic end-result arising from the installation of that specific product.

3.5. The MANUFACTURER guarantees the good quality and the absence of defects in the PRODUCTS supplied.

The guarantee does not apply to PRODUCTS classified by the MANUFACTURER as inferior to the 1st. choice quality, or to the stocks of products that have been discontinued, when they are sold in bulk or indicated as special lot.

3.6. The MANUFACTURER shall not be liable for any defects and/or anomalies existing in the PRODUCTS that do not result from their technical specifications but rather arise from the improper use of the PRODUCTS by the purchasers and/or third parties acting on their behalf. In particular, the MANUFACTURER does not accept any complaints or disputes related to the above described situations.

3.7. Complaints arising from the existence of evident or hidden defects must be made to the MANUFACTURER in writing by the purchaser within 60 days from the date of delivery of the goods. The Manufacturer's liability for defects inherent in the products delivered to the Buyer is expressly limited to 2 years from the date of receipt of the goods by the Buyer.

3.8. In general, the guarantee only applies to defects found in products which have not yet been applied. For defects detected after the PRODUCTS have been applied, the guarantee can only apply if the MANUFACTURER has confirmed that the installation of the PRODUCT has been carried out in accordance with the best rules of the activity (DIN 18352), as well as in accordance with the procedures described in the MANUFACTURER's application and maintenance manual.

3.9. The guarantee granted by the MANUFACTURER is limited to the replacement of the defective products with other products of the same type without defect, plus transport costs. The reimbursement of any other costs and/or expenses, in particular demolition and relocation costs, is expressly excluded. In any case, the MANUFACTURER's guarantee does not exceed five times the value of the material claimed, up to a maximum of 10,000 Euros.

3.10. The MANUFACTURER is not responsible for any claims due to a classification of ceramic materials made by certification and control bodies other than the European ones, indicated in article 3.1, based on technical specifications that do not correspond to those indicated by the MANUFACTURER. Any specialised technical analysis requested by the buyer will be based on the correspondence of the materials sold with the technical characteristics indicated by the MANUFACTURER, at that time in force in Portugal.

4 - Prices and Payment Conditions

4.1. The sale prices of the PRODUCTS are those indicated in the MANUFACTURER's price list in force on the date of confirmation of order. For sales contracts with separate deliveries, the price shall be the one set out in the price list in force on the date of each delivery, unless the contracting parties have stipulated differently.

For PRODUCTS aimed at foreign markets the price will be calculated, by indication of the MANUFACTURER, in the foreign currency of the country of destination or in Euros.

4.2. Unless otherwise expressly agreed, payments shall be made by bank transfer within 30 days from the date of invoice. All bank and transfer charges shall be borne by the purchaser. In the event of delay in making payment, the MANUFACTURER shall be entitled, without prior notice to the buyer, to apply a late payment and penalty interest rate equivalent to the 6-month EURIBOR rate plus 5%, without prejudice to the right to compensation for any other losses.

5 - Manufacturer's Agents

5.1. The MANUFACTURER's agents promote the sale of the PRODUCTS and are not authorised to act in the name and on behalf of the MANUFACTURER, unless they obtain express specific authorisation to do so.

5.2. Orders received by agents are not binding on the MANUFACTURER and must therefore be expressly accepted in writing by the MANUFACTURER itself.

6 – Ownership Reservation

6.1. It is agreed between the parties that the sale of the PRODUCTS shall be made with ownership reservation by the MANUFACTURER until full payment of the agreed price is entirely made by the purchaser. However, the risk of loss of the goods is transferred to the purchaser upon delivery of the PRODUCTS.

6.2. In case of sales to foreign countries, when the goods are sold and delivered to third parties within the framework of the Buyer's normal business activities and the ownership of the goods has not yet been transferred, the MANUFACTURER's ownership reservation remains valid vis-à-vis third parties.

6.3. In the event of delays in payment the MANUFACTURER has the right, without the need for any formality including any prior notice to the purchaser, to collect all goods subject to ownership reservation and if legally enshrined, all credit titles to third parties, and the MANUFACTURER expressly reserves the right to use all legal means at its disposal to recover damages it has suffered or may suffer as a result of defaulting conduct of the purchaser.

7 - Case of Force Majeure

7.1. The MANUFACTURER shall not be liable before the purchaser for any breach of contract, including non-delivery or delayed delivery of the PRODUCT, caused by events that are beyond its control, such as the non-delivery or late delivery of materials by suppliers, facilities breakdowns, strikes, facts of nature, interruptions in power supply, suspension or transport difficulties.

8 - Applicable Law - Competent Jurisdiction

8.1. Any dispute arising out of or relating to this sale shall be submitted exclusively to the courts of the seller's registered office, to the exclusion of any other jurisdiction.

Conditions Générales de Vente

1 - Conditions applicables

1.1. Les conditions générales, précisées et énumérées ci-après, dénommées les « CONDITIONS », font partie intégrante du contrat de vente de carrelages et autres produits céramiques - ci-après dénommés le « PRODUIT » ou les « PRODUITS » - fabriqués par Love Tiles - Gres Panaria Portugal, S.A., également dénommé le « FABRICANT ».

1.2. Sauf cas particuliers ou exceptionnels, où l'application de ces conditions générales est expressément modifiée par un accord écrit et signé par le FABRICANT, celles-ci représentent les conditions exclusives appliquées à cette vente. Si une ou plusieurs parties de ces CONDITIONS ou contrats, individuellement considérés et dont elles en font partie, sont de quelque manière que ce soit considérées comme nulles, invalides ou inapplicables pour des raisons de force majeure, les CONDITIONS générales ou particulières resteront valables dans leur ensemble, les conditions invalides étant remplacées par de nouvelles dispositions qui reproduiront, autant que possible, l'intention initiale des parties.

1.3. Les ventes effectuées par notre entreprise sont régies par la Convention des Nations Unies sur les contrats de vente internationale de marchandises (CVIM — Vienne, 1980). Les parties conviennent que toutes les questions relatives à la formation du contrat, à son exécution, aux défauts de conformité, aux garanties, aux responsabilités et aux droits des parties seront interprétées conformément à la CVIM. L'acheteur s'engage à examiner les marchandises et à notifier tout défaut de conformité dans les délais prévus aux articles 38 et 39 de la Convention, sauf stipulation contractuelle contraire.

2 - Exécution du contrat de vente - Livraison des produits

2.1. Le contrat est conclu lorsque le vendeur ou l'acquéreur prend connaissance de l'acceptation écrite du contrat par l'autre partie.

2.2. Une commande qui n'a pas été confirmée par écrit ne peut en aucun cas être considérée comme acceptée, à moins qu'elle n'ait été exécutée par le FABRICANT par l'expédition ou la livraison des PRODUITS. La livraison partielle des PRODUITS commandés n'implique pas l'acceptation de l'intégralité de la commande, mais uniquement de la partie des PRODUITS effectivement livrée.

2.3. Sauf accord préalable et exprès contraire, la livraison des PRODUITS sera effectuée exclusivement sur le territoire du Portugal continental et à condition qu'il soit possible et autorisé d'accéder des véhicules lourds avec des semi-remorques de 24 (vingt-quatre) tonnes de poids brut au lieu de livraison.

2.4. Sauf convention contraire expresse fixée par écrit, toutes les dates indiquées aux fins de la livraison seront considérées comme des dates approximatives.

3 - Caractéristiques des produits - Garantie - Réclamations

3.1. LES PRODUITS fabriqués par Love Tiles - Gres Panaria Portugal, S.A., sont produits conformément aux normes européennes applicables. Le FABRICANT vend de préférence à des revendeurs professionnels, qui sont responsables de fournir des informations techniques correctes et appropriées aux utilisateurs finaux ou aux détaillants.

Le classement des PRODUITS est indiqué par le FABRICANT dans le matériel publicitaire et / ou dans les listes de prix. En conséquence, l'acquéreur doit utiliser les PRODUITS conformément aux spécifications du FABRICANT.

Afin de faciliter la suggestion d'utilisation et d'adapter la spécification standard à la production spécifique du FABRICANT, en ce qui concerne tous les produits, listes de prix ou catalogues, des symboles spécifiques sont ajoutés, indiquant l'utilisation recommandée de chaque produit par le FABRICANT.

3.2. Les différences de tonalité ou de chrominance qui peuvent être constables ne sont pas dues à des défauts du PRODUIT, mais si à une caractéristique spécifique du matériau céramique après avoir été soumis à une cuisson à haute température. La particularité de « résistance au gel » ne s'applique qu'aux produits spécifiquement garantis par le FABRICANT à cet effet, tel qu'indiqué dans son matériel publicitaire et / ou dans les listes de prix. Cette indication n'étant pas présente, les produits sont uniquement et exclusivement conçus pour être utilisés en intérieur ou, dans tous les cas, dans des lieux non exposés à des éléments atmosphériques qui altèrent les caractéristiques de résistance ou l'aspect d'origine du PRODUIT (par exemple : précipitations atmosphériques, soleil, humidité, basses températures, etc.).

3.3. Les carreaux aux faces polies peuvent changer d'apparence lorsqu'elles sont utilisées sur le sol des pièces avec accès à l'extérieur ou des espaces où une circulation piétonne régulière est prévue. Les carreaux polis peuvent également être glissantes, surtout lorsqu'elles sont mouillées ou sous l'effet de l'humidité. Compte tenu de cette caractéristique, le FABRICANT déconseille d'utiliser ces PRODUITS dans les lieux publics. Pour les espaces avec une circulation intense de personnes, l'acquéreur doit acheter exclusivement les PRODUITS classés par le FABRICANT comme « PEI V » ou le « Grès cérame pleine masse », en particulier les PRODUITS que le FABRICANT recommande spécifiquement pour une utilisation dans les espaces publics.

3.4. La présentation des PRODUITS sur des dépliants ou tout autre matériel promotionnel du FABRICANT est purement illustrative et ne représente pas nécessairement le résultat esthétique final de la pose de ce produit spécifique.

3.5. Le FABRICANT garantit la bonne qualité et l'absence de défauts dans les PRODUITS fournis.

La garantie ne s'applique pas aux PRODUITS classés par le FABRICANT comme inférieurs à la qualité de 1er choix, ni aux stocks de produits dont la production est abandonnée, lorsqu'ils sont vendus en vrac ou indiqués comme lot spécial.

3.6. Le FABRICANT n'est pas responsable des défauts et / ou anomalies existant dans les PRODUITS pouvant découler du non-respect des spécifications techniques de ceux-ci, résultant d'une mauvaise utilisation des PRODUITS par les acheteurs et / ou des tiers agissant en leur nom. En particulier, le FABRICANT n'accepte aucune réclamation ou contestation liée aux situations décrites ci-dessus.

3.7. Les réclamations résultant de l'existence de défauts évidents ou cachés doivent être adressées par écrit au FABRICANT par l'acquéreur dans un délai de 60 jours à compter de la date de livraison des marchandises. La responsabilité du fabricant à l'égard des défauts inhérents aux produits livrés à l'acquéreur est expressément limitée à une période de 2 ans à compter de la date de réception des marchandises par l'acquéreur.

3.8. En général, la garantie ne s'applique qu'aux défauts constatés dans les produits qui n'ont pas encore été appliqués. En ce qui concerne les défauts détectés après la pose des PRODUITS, la garantie ne peut s'appliquer que lorsque le FABRICANT confirme que celle-ci a été réalisée conformément aux meilleures règles du métier (DIN 18352) et aux procédures décrites dans le manuel de pose et d'entretien du FABRICANT.

3.9. La garantie accordée par le FABRICANT est limitée au remplacement des produits défectueux par d'autres produits du même type sans défaut, majoré des frais de port. Le remboursement de tous autres frais et / ou dépenses et notamment des frais de démolition et de remplacement est expressément exclu. Dans tous les cas, la garantie du FABRICANT ne peut excéder cinq fois la valeur du matériau réclamé, jusqu'à un montant de 10 000 euros maximum.

3.10. Le FABRICANT ne peut pas être tenu responsable des réclamations dues à tout classement des matériaux céramiques effectué par des organismes de certification et de contrôle différents des organismes européens indiqués à l'article 3.1, sur la base des spécifications techniques qui ne correspondent pas à celles indiquées par le FABRICANT. Toute analyse technique spécialisée éventuelle, demandée par l'acquéreur, sera basée sur la correspondance des matériaux vendus avec les caractéristiques techniques indiquées par le FABRICANT, à présent applicables au Portugal.

4 - Prix et modalités de paiement

4.1. Les prix de vente des PRODUITS sont indiqués dans la liste de prix du FABRICANT, en vigueur à la date de confirmation de la commande. Pour les contrats de vente avec des livraisons séparées, le prix sera celui indiqué dans la liste de prix en vigueur à la date de chaque livraison, sauf si les parties contractantes en ont convenu autrement par écrit.

Pour les PRODUITS destinés aux marchés étrangers, le prix sera calculé, comme indiqué par le FABRICANT, dans la devise étrangère du pays de destination ou en Euros.

4.2. Sauf convention contraire expresse, les paiements seront effectués par virement bancaire, dans les 30 jours suivant la date de facturation. Tous les frais bancaires et de transfert sont à la charge de l'acquéreur. En cas de retard de paiement, le FABRICANT aura le droit, sans notification préalable à l'acheteur, d'appliquer un taux d'intérêt de retard et punitif équivalent au taux EURIBOR à 6 mois majoré de 5%, sans préjudice du droit à l'indemnisation pour tout autre dommage.

5 - Agents du fabricant

5.1. Les agents du FABRICANT doivent promouvoir la vente des PRODUITS, mais ne sont pas autorisés à agir pour le compte du FABRICANT, sauf s'ils obtiennent une autorisation expresse spécifique à cet effet.

5.2. Les commandes reçues par les agents n'engagent pas le FABRICANT. Elles doivent donc être expressément acceptées par écrit par le FABRICANT lui-même.

6 - Réserve de propriété

6.1. Les parties conviennent que la vente des PRODUITS est effectuée sous réserve de propriété par le FABRICANT jusqu'au paiement intégral du prix convenu, par l'acquéreur. Cependant, le risque de perte de la marchandise est transféré à l'acquéreur lors de la livraison des PRODUITS.

6.2. Dans le cas de ventes à l'étranger, lorsque les marchandises sont vendues et livrées à des tiers dans le cadre des activités commerciales normales de l'acquéreur et que le transfert de propriété des marchandises n'a pas encore eu lieu, le droit de réserve de propriété du FABRICANT reste valable à l'égard des tiers.

6.3. En cas de retard de paiement, le FABRICANT a le droit, sans avoir recours à aucune formalité, y compris à toute mise en demeure adressée à l'acquéreur, de retirer toutes les marchandises sous réserve de propriété et, lorsque légalement prévu, tous titres de crédit auprès de tiers. Le FABRICANT est en droit, qui lui est expressément réservé, de recourir à tous les moyens juridiques à sa disposition en vue de compenser les pertes qu'il a subies ou subira du fait du comportement fautif de l'acquéreur.

7 - Force majeure

7.1. Le FABRICANT ne sera pas responsable envers l'acheteur de toute violation du contrat, y compris la non-livraison ou la livraison tardive du PRODUIT, causée par des événements indépendants de sa volonté et qui sont hors de son contrôle, tels que la non-livraison ou la livraison retardée des matériaux, de la part des fournisseurs, dysfonctionnements des locaux, grèves, faits de la nature, interruptions de l'approvisionnement en électricité, suspension ou difficultés de transport.

8 - Loi applicable - Juridiction compétente

8.1. Pour la résolution de tout litige découlant de la présente vente, les parties conviennent que le tribunal compétent, à l'exclusion de tout autre, est celui du siège du vendeur.

1 - Anwendbarkeit der Bedingungen

1.1. Die nachstehend aufgeführten und definierten allgemeinen Bedingungen - im Folgenden als "BEDINGUNGEN" bezeichnet - sind integraler Bestandteil des Vertrags für den Kauf und Verkauf von Mosaikfliesen und anderen keramischen Produkten - im Folgenden als "PRODUKT" oder "PRODUKTE" bezeichnet - hergestellt von Love Tiles - Gres Panaria Portugal, S.A., auch als "HERSTELLER" bezeichnet.

1.2. Außer in besonderen oder außergewöhnlichen Fällen, in denen die Anwendung dieser Bedingungen ausdrücklich durch eine schriftliche Vereinbarung geändert und vom HERSTELLER unterzeichnet wurden, stellen sie die ausschließlichen Bedingungen dar, die in Verbindung mit einem solchen Verkauf geltend gemacht werden können. Wenn ein oder mehrere Teile dieser BEDINGUNGEN oder Verträge einzeln betrachtet werden und Bestandteil dieser sind, aufgrund höherer Gewalt in irgendeiner Weise als nichtig, ungültig oder nicht durchsetzbar gelten, bleiben die allgemeinen oder besonderen BEDINGUNGEN als Ganzes gültig. Die ungültigen Bedingungen werden durch neue Bestimmungen ersetzt, die so weit wie möglich die ursprüngliche Absicht der Parteien wiedergeben.

1.3. Sämtliche von unserem Unternehmen durchgeführten Verkäufe unterliegen dem Übereinkommen der Vereinten Nationen über Verträge über den internationalen Warenkauf (CISG, Wien 1980).Die Parteien vereinbaren, dass alle Fragen zum Vertragsabschluss, zur Vertragserfüllung, zur Nichtkonformität, zu Gewährleistungen, Haftungen und den Rechten der Parteien nach dem CISG ausgelegt werden. Der Käufer verpflichtet sich, die Ware zu prüfen und jede Vertragswidrigkeit innerhalb der in den Artikeln 38 und 39 des Übereinkommens vorgesehenen Fristen anzuzeigen, es sei denn, die Parteien haben etwas anderes vereinbart.

2 - Ausführung des Kaufvertrags - Lieferung von Produkten

2.1. Der Vertrag ist abgeschlossen, wenn der vorschlagenden Partei oder dem Käufer die schriftliche Annahme durch die Gegenpartei bekannt ist.

2.2. Eine Bestellung, die nicht schriftlich bestätigt wurde, kann unter keinen Umständen als angenommen betrachtet werden, es sei denn, sie wurde vom HERSTELLER durch den Versand oder die Lieferung der PRODUKTE ausgeführt. Die Teillieferung der bestellten PRODUKTE bedeutet nicht die Annahme der gesamten Bestellung, sondern nur des Teils der PRODUKTE, der tatsächlich geliefert worden ist.

2.3. Die Lieferung der PRODUKTE erfolgt ausschließlich auf dem portugiesischen Festland und unter der Bedingung, dass schwere Fahrzeuge mit Sattelanhängern von 24 (vierundzwanzig) Tonnen Bruttogewicht den Lieferort erreichen können und dürfen, es sei denn, es wurde im Voraus ausdrücklich etwas anderes vereinbart.

2.4. Sofern nicht ausdrücklich anders vereinbart, gelten alle für Lieferzwecke angegebenen Daten als ungefähre Daten.

3 - Eigenschaften der Produkte - Garantie - Reklamationen

3.1. Die von Love Tiles - Gres Panaria Portugal, S.A. hergestellten PRODUKTE werden in Übereinstimmung mit den geltenden europäischen Normen hergestellt. Der HERSTELLER verkauft vorzugsweise an professionelle Wiederverkäufer. Diese sind für die Bereitstellung korrekter und angemessener technischer Informationen für Endbenutzer oder Einzelhändler verantwortlich.

Die Klassifizierung der PRODUKTE wird vom HERSTELLER auf Werbematerial und/oder Preislisten angegeben. Folglich muss der Käufer die PRODUKTE in Übereinstimmung mit den Spezifikationen des HERSTELLERS verwenden.

Um den Verwendungsvorschlag zu erleichtern und die Standardspezifikation an die spezifische Produktion des HERSTELLERS anzupassen, sind auf allen Produkten, Preislisten oder Katalogen spezifische Symbole angebracht, die die vom HERSTELLER empfohlene Verwendung für jedes Produkt angeben.

3.2. Die Unterschiede in Tonalität oder Farbe , wenn überhaupt, sind nicht auf Fehler im PRODUKT zurückzuführen, sondern eine spezifische Eigenschaft des keramischen Materials, das bei hohen Temperaturen gebrannt wurde. Die besondere Eigenschaft der "Frostbeständigkeit" gilt nur für Produkte, für die der HERSTELLER ausdrücklich in seinen Werbematerialien und/oder in den Preislisten diese Garantie gibt. Fehlt diese Angabe, werden die Produkte nur und ausschließlich für die Verwendung in Innenräumen oder jedenfalls für die Verwendung an Orten betrachtet, die nicht atmosphärischen Elementen ausgesetzt sind, die die Haltbarkeitseigenschaften oder das ursprüngliche Aussehen des PRODUKTES verändern (z. B. atmosphärischer Niederschlag, Sonne, Feuchtigkeit, niedrige Temperaturen, etc.).

3.3. Die Fliesen mit den polierten Oberflächen können ihr Aussehen verändern, wenn sie als Bodenbelag in Räumen verwendet werden, die von außen zugänglich sind, oder in Räumen, in denen intensiver Fußgängerverkehr erwartet wird. Polierte Fliesen können auch rutschig sein, insbesondere wenn sie nass oder feucht sind. Aus diesem Grund rät der HERSTELLER davon ab, diese PRODUKTE an öffentlichen Orten zu verwenden. Für Orte, an denen intensiver Fußgängerverkehr zu erwarten ist, sollte der Käufer nur PRODUKTE kaufen, die vom HERSTELLER als "PEI V" oder "Vollmassiges Feinsteinzeug" klassifiziert werden, insbesondere solche PRODUKTE, die der HERSTELLER speziell für die Verwendung an öffentlichen Orten empfiehlt.

3.4. Die Präsentationen der PRODUKTE in Broschüren oder in anderem Werbematerial des HERSTELLERS dienen lediglich der Veranschaulichung und stellen nicht unbedingt das ästhetische Endergebnis dar, das sich aus der Installation dieses spezifischen Produkts ergibt.

3.5. Der HERSTELLER garantiert die gute Qualität und die Mängelfreiheit der gelieferten PRODUKTE.

Die Garantie gilt nicht für PRODUKTE, die vom HERSTELLER als minderwertig gegenüber der Qualität der 1. Wahl eingestuft werden, oder für die Lagerbestände von Produkten, die eingestellt wurden, wenn sie lose verkauft oder als Sonderposten angegeben werden.

Allgemeine Verkaufsbedingungen

3.6. Der HERSTELLER haftet nicht für Mängel und/oder Anomalien der PRODUKTE, die sich nicht aus den technischen Spezifikationen derselben ableiten, sondern aus der unsachgemäßen Verwendung der PRODUKTE durch die Käufer und/oder in ihrem Namen handelnde Dritte entstehen. Insbesondere akzeptiert der HERSTELLER keine Beschwerden oder Streitigkeiten im Zusammenhang mit den oben beschriebenen Situationen.

3.7. Ansprüche, die sich aus dem Vorhandensein von patentierten oder versteckten Mängeln ergeben, müssen vom Käufer innerhalb von 60 Tagen nach Lieferung der Ware schriftlich dem HERSTELLER bekannt gemacht werden. Die Haftung des Herstellers für Mängel an den an den Käufer gelieferten Produkten ist ausdrücklich auf einen Zeitraum von 2 Jahren ab dem Datum des Erhalts der Ware durch den Käufer beschränkt.

3.8. Im Allgemeinen gilt die Garantie nur für Mängel an Produkten, die noch nicht angewendet wurden. Für Mängel, die nach der Anwendung der PRODUKTE festgestellt werden, kann die Garantie nur dann gelten, wenn der HERSTELLER bestätigt hat, dass die Installation des PRODUKTES nach den besten Praktiken (DIN 18352) sowie in Übereinstimmung mit den im Anwendungs- und Wartungshandbuch des HERSTELLERS beschriebenen Verfahren durchgeführt wurde.

3.9. Die vom HERSTELLER gewährte Garantie beschränkt sich auf den Ersatz defekter Produkte durch andere Produkte desselben Typs ohne Mängel, zuzüglich Transportkosten. Die Erstattung sonstiger Kosten und/ oder Aufwendungen, insbesondere Abbruch- und Umzugskosten, ist ausdrücklich ausgeschlossen. In jedem Fall darf die Garantie des HERSTELLERS den fünffachen Wert des beanspruchten Materials bis zu einem Höchstbetrag von 10.000 Euro nicht überschreiten.

3.10. Der HERSTELLER ist nicht verantwortlich für Ansprüche aufgrund einer Klassifizierung von keramischen Materialien, die von anderen als den in Artikel 3.1 angegebenen europäischen Zertifizierungs- und Kontrollorganen auf der Grundlage technischer Spezifikationen vorgenommen wurden, die nicht den vom HERSTELLER angegebenen entsprechen. Jede spezialisierte technische Analyse, die vom Käufer angefordert wird, basiert auf der Übereinstimmung der verkauften Materialien mit den vom HERSTELLER angegebenen technischen Eigenschaften, die zu diesem Zeitpunkt in Portugal gelten.

4 - Preise und Zahlungsbedingungen

4.1. Die Verkaufspreise der PRODUKTE sind diejenigen, die in der am Datum der Auftragsbestätigung gültigen Preisliste des HERSTELLERS angegeben sind. Bei Kaufverträgen mit getrennten Lieferungen gilt der Preis, der in der am Tag der jeweiligen Lieferung gültigen Preisliste angegeben ist, sofern die Vertragsparteien nichts anderes schriftlich vereinbart haben.

Für PRODUKTE, die für ausländische Märkte bestimmt sind, wird der Preis nach Angaben des HERSTELLERS in der Fremdwährung des Bestimmungslandes oder in Euro berechnet.

4.2. Sofern nicht ausdrücklich anders vereinbart, sind Zahlungen per Banküberweisung innerhalb von 30 Tagen ab Rechnungsdatum zu leisten. Alle Bank- und Überweisungsgebühren gehen zu Lasten des Käufers. Bei Zahlungsverzug ist Der HERSTELLER hat das Recht, ohne vorherige Ankündigung an den Käufer einen Verzugszinssatz und Strafzinsen in Höhe des 6-Monats-EURIBOR-Satzes zuzüglich 5 % zu erheben, unbeschadet des Rechts auf Entschädigung für sonstige Verluste.

5 - Vertreter des Herstellers

5.1. Die Vertreter des HERSTELLERS werben für den Verkauf der PRODUKTE und sind nicht befugt, im Namen und im Auftrag des HERSTELLERS zu handeln, es sei denn, sie erhalten dafür eine ausdrückliche Sondergenehmigung.

5.2. Aufträge, die von Vertretern entgegengenommen werden, sind für den HERSTELLER nicht bindend und müssen daher vom HERSTELLER selbst ausdrücklich und schriftlich angenommen werden.

6 – Eigentumsvorbehalt

6.1. Es wird zwischen den Parteien vereinbart, dass der Verkauf der PRODUKTE unter Eigentumsvorbehalt seitens des HERSTELLERS erfolgt, bis der Käufer den vereinbarten Preis vollständig bezahlt hat. Das Verlustrisiko der Waren geht jedoch mit der Lieferung der PRODUKTE auf den Käufer über.

6.2. Im Falle von Verkäufen ins Ausland bleibt der Eigentumsvorbehalt des HERSTELLERS gegenüber dem Dritten bestehen, wenn die Waren im Rahmen der normalen Geschäftstätigkeit des Käufers an einen Dritten verkauft und geliefert werden und das Eigentumsrecht an den Waren noch nicht übertragen wurde.

6.3. Bei Zahlungsverzug hat der HERSTELLER das Recht, ohne jegliche Formalität, einschließlich irgendwelcher vorherigen Benachrichtigung des Käufers, alle unter Eigentumsvorbehalt stehenden Waren und, falls gesetzlich erlaubt, alle Kreditittel vor Dritten einzuziehen, wobei dem HERSTELLER ausdrücklich das Recht vorbehalten bleibt, alle ihm zur Verfügung stehenden rechtlichen Mittel einzusetzen, um den Schaden, den er aufgrund des säumigen Verhaltens des Käufers erlitten hat oder erleiden wird, wieder gutzumachen.

7 – Fall von höherer Gewalt

7.1. Der HERSTELLER ist nicht haftbar gegenüber dem Käufer für jegliche Vertragsverletzung, einschließlich der Nichtlieferung oder verspäteten Lieferung des PRODUKTS, die auf Ereignisse zurückzuführen sind, die außerhalb seiner Kontrolle liegen, wie z.B. Nichtlieferung oder verspätete Lieferung von Materialien durch Lieferanten, Betriebsstörungen, Streiks, Naturkatastrophen, Unterbrechungen der Stromversorgung, Aussetzung oder Transportschwierigkeiten.

8 – Anwendbares Recht - Zuständiges Gericht

8.1. Die Parteien vereinbaren, dass sämtliche Streitigkeiten, die sich aus oder im Zusammenhang mit dem Abschluss, der Wirksamkeit, der Auslegung oder der Erfüllung dieses Vertrags ergeben, ausschließlich der Gerichtsbarkeit der Gerichte am Sitz des Verkäufers unterliegen. Auf jeglichen anderen Gerichtsstand wird ausdrücklich verzichtet.

Основные условия продаж

1 – Применимость условий

1.1. Перечисленные и указанные ниже общие условия, в дальнейшем именуемые «УСЛОВИЯ», составляют неотъемлемую часть договора купли-продажи мозаики и других керамических изделий, именуемых в дальнейшем «ПРОДУКТ» или «ПРОДУКЦИЯ», производства Love Tiles - Gres Panaria Portugal, S.A., также известного как “ПРОИЗВОДИТЕЛЬ”.

1.2. За исключением особых или исключительных случаев, когда применение этих условий конкретно изменяется посредством письменного соглашения, составленного и подписанного ПРОИЗВОДИТЕЛЕМ, они представляют собой исключительные условия, применяемые к данной продаже. Если одна или несколько частей настоящих УСЛОВИИ или договоров, рассматриваемых индивидуально и являющихся неотъемлемой их частью, каким-либо образом считается недействительной или неприменимой по причинам форс-мажора, общие или частные УСЛОВИЯ, в целом, будут оставаться в силе, а недействительные условия будут заменены новыми положениями, которые будут максимально воспроизводить первоначальные намерения сторон.

1.3. Продажи, осуществляемые нашей компанией, регулируются Конвенцией Организации Объединенных Наций о договорах международной купли-продажи товаров (CISG — Вена, 1980 г.). Стороны соглашаются, что все вопросы, касающиеся заключения договора, исполнения, несоответствия, гарантий, обязанностей и прав сторон, должны толковаться в соответствии с CISG. Покупатель обязуется осмотреть товар и уведомить о любом несоответствии в сроки, установленные статьями 38 и 39 Конвенции, если иное не предусмотрено в договоре.

2 – Оформление договора купли-продажи – Доставка товара

2.1. Контракт считается заключенным, когда предлагающая сторона или покупатель узнает о письменном принятии контракта контрагентом.

2.2. Заказ, не подтвержденный в письменной форме, ни при каких обстоятельствах не может считаться принятым, за исключением если он был выполнен ПРОИЗВОДИТЕЛЕМ посредством отправки или доставки ТОВАРА. Частичная доставка заказанных ТОВАРОВ не подразумевает принятие всего заказа, а только той части ТОВАРОВ, которая была фактически доставлена.

2.3. Если ранее и прямо не оговорено иное, доставка ТОВАРА будет осуществляться исключительно в пределах континентальной территории Португалии и при условии, что будет возможен и разрешен доступ к месту доставки грузовым автомобилям с полуприцепом грузоподъемностью 24 (двадцать четыре) тонны, вес брутто.

2.4. Если прямо не согласовано иное, все даты, указанные для целей доставки, будут рассматриваться как приблизительные.

3 – Характеристика продукции - Гарантия - Претензии

3.1. ПРОДУКЦИЯ, производимая Love Tiles - Gres Panaria Portugal, S.A., производится в соответствии с действующими европейскими стандартами. ПРОИЗВОДИТЕЛЬ предпочитает продавать свою продукцию профессиональным посредникам, которые несут ответственность за предоставление правильной и соответствующей технической информации конечным пользователям, или продавцам розничной торговли.

Классификация ТОВАРОВ указывается ПРОИЗВОДИТЕЛЕМ в рекламных материалах и/или в прайс-листах. Следовательно, покупатель должен применять ТОВАР в соответствии со спецификациями ПРОИЗВОДИТЕЛЯ.

Для облегчения предложения по использованию и адаптации стандартной спецификации к конкретной продукции ПРОИЗВОДИТЕЛЯ, на всех продуктах, прайс-листах или каталогах есть специальные символы, указывающие на рекомендуемое ПРОИЗВОДИТЕЛЕМ использование для каждого продукта.

3.2. Различия в тональности или в цветности, которые могут оставаться неизменными, не связаны с дефектами ИЗДЕЛИЯ, а являются специфической характеристикой керамического материала, который был подвергнут высокотемпературному обжигу. Особенность «морозостойкости» применима только к продукции, которую ПРОИЗВОДИТЕЛЬ гарантировал специально для этой цели, посредством прямого указания в своих рекламных материалах и/или в прайс-листах. При отсутствие этого указания продукты будут рассматриваться исключительно для использования внутри помещений или, в любом случае, для использования в местах, которые не подвергаются воздействию атмосферных элементов, которые изменяют характеристики сопротивления или первоначальный внешний вид ПРОДУКТА (например: атмосферные осадки, солнце, влажность, низкие температуры и др.).

3.3. Мозаика с полированными поверхностями может изменить свой внешний вид при использовании на полу в помещениях, имеющих доступ снаружи, или в помещениях, где предполагается интенсивное движение пешеходов. Полированная мозаика также может быть скользкой, особенно когда она влажная или находится под воздействием влаги. По этой причине, ПРОИЗВОДИТЕЛЬ не рекомендует использовать эту ПРОДУКЦИЮ в общественных местах. Для пространств с интенсивным движением людей покупатель должен приобретать только ПРОДУКЦИЮ, классифицированную ПРОИЗВОДИТЕЛЕМ, как “PEI V” или “Универсальный Керамогранит”, в частности ту ПРОДУКЦИЮ, которую ПРОИЗВОДИТЕЛЬ рекомендует использовать в общественных местах.

3.4. Представление ПРОДУКЦИИ в брошюрах или в любых других рекламных материалах ПРОИЗВОДИТЕЛЯ носит исключительно иллюстративный характер и не обязательно отражает конечный эстетический результат установки этого конкретного продукта.

3.5. ПРОИЗВОДИТЕЛЬ гарантирует хорошее качество и отсутствие брака поставляемой ПРОДУКЦИИ. Гарантия не распространяется на ТОВАРЫ, классифицированные ПРОИЗВОДИТЕЛЕМ, как худшие по качеству, по 1-му выбору, или на те запасы продукции, которые были сняты с производства, когда они продаются оптом или указаны как специальные партии.

3.6. ПРОИЗВОДИТЕЛЬ не несет ответственности за любые дефекты и/или аномалии, обнаруженные в ПРОДУКЦИИ, которые не являются следствием технических характеристик этих материалов, а являются результатом неправильного использования ПРОДУКЦИИ покупателями и/или третьими лицами, действующими от их имени. В частности, ПРОИЗВОДИТЕЛЬ не принимает никаких претензий или споров, связанных с ситуациями, описанными выше.

3.7. Претензии, связанные с наличием патентных или скрытых дефектов, должны быть предъявлены покупателем в письменной форме в адрес ПРОИЗВОДИТЕЛЯ в течение 60 дней с даты доставки товара. Ответственность ПРОИЗВОДИТЕЛЯ за дефекты, присущие товарам, доставленным покупателю, конкретно ограничена сроком в 2 года с даты получения товара покупателем.

3.8. Как правило, гарантия распространяется только на дефекты, обнаруженные в продукции, которая еще не была применена. В отношении дефектов, обнаруженных после применения ПРОДУКТОВ, гарантия действует только в том случае, если ПРОИЗВОДИТЕЛЬ подтвердил, что применение ПРОДУКТА было выполнено в соответствии случшими правилами деятельности (DIN 18352), а также в соответствии с процедурами, описанными ПРОИЗВОДИТЕЛЕМ в руководстве по применению и эксплуатации.

3.9. Гарантия, предоставляемая ПРОИЗВОДИТЕЛЕМ, ограничивается заменой дефектных продуктов на другие продукты того же типа, без дефектов, включая стоимость доставки. Возмещение любых других затрат и/или расходов и, в частности, затрат на снос и замену, категорически исключается. В любом случае, гарантия ПРОИЗВОДИТЕЛЯ не может превысить пятикратную стоимость востребованного продукта, до максимальной стоимости 10.000 евро.

3.10. ПРОИЗВОДИТЕЛЬ не несет ответственности за какие-либо претензии в связи с классификацией керамических материалов, проводимой органами сертификации и контроля, отличной от европейской, указанной в статье 3.1, на основании технических характеристик, не соответствующих указанным ПРОИЗВОДИТЕЛЕМ. Любой, возможный специализированный технический анализ, запрошенный покупателем, будет основан на соответствии продаваемых материалов техническим характеристикам, указанных ПРОИЗВОДИТЕЛЕМ, действующих, в настоящее время, в Португалии.

4 – Цены и условия оплаты

4.1. Продажные цены на ПРОДУКТЫ указаны в прейскуранте ПРОИЗВОДИТЕЛЯ, действующем на день подтверждения заказа. Для договоров купли-продажи с отдельными поставками стоимость будет соответствовать цене, указанной в прейскуранте, действующем на дату каждой поставки, если договаривающиеся стороны не указали иное направление.

Для ТОВАРОВ, предназначенных для зарубежных рынков, цена будет рассчитываться, по указанию ПРОИЗВОДИТЕЛЯ, в иностранной валюте страны назначения или в евро.

4.2. За исключением случаев, когда прямо оговорено иное, платежи будут производиться банковским переводом в течение 30 дней с даты выставления счета. Все банковские сборы и комиссии за перевод оплачивает покупатель. В случае задержки платежа ПРОИЗВОДИТЕЛЬ будет иметь право без необходимости предварительного уведомления покупателю применять штрафные процентные ставки, эквивалентные 6-месячной ставке EURIBOR плюс 5%, без ущерба для права на компенсацию за любые другие потери.

5 - Представители производителя

5.1. Агенты ПРОИЗВОДИТЕЛЯ способствуют продаже ПРОДУКТОВ и не имеют права действовать от имени ПРОИЗВОДИТЕЛЯ, если только они не получат для этой цели специальное прямое разрешение.

5.2. Заказы, полученные агентами фирмы, не являются обязательными для ПРОИЗВОДИТЕЛЯ и поэтому должны быть письменно подтверждены самим ПРОИЗВОДИТЕЛЕМ.

6 – Право собственности

6.1. Между сторонами согласовано, что продажа ПРОДУКЦИИ осуществляется с правом собственности со стороны ПРОИЗВОДИТЕЛЯ до полной оплаты покупателем по согласованной цене. Однако риск потери товара переходит к покупателю при доставке ТОВАРА.

6.2. В случае продаж за границу, когда товары продаются и доставляются третьими лицами в рамках обычной коммерческой деятельности Покупателя и право собственности на товары еще не передано, право собственности ПРОИЗВОДИТЕЛЯ остается в силе с третьими сторонами.

6.3. В случае просрочки платежа, ПРОИЗВОДИТЕЛЬ имеет право, без необходимости прибегать к какому-либо формальностям, включая какое-либо предварительное уведомление покупателю, получить обратно все товары, подлежащие сохранению его праву собственности, и, если это законодательно закреплено, - все кредитные документы перед третьими лицами, сохраняя за собой право ПРОИЗВОДИТЕЛЯ, защищенное законом и имеющихся в распоряжении правовых средств, с целью компенсации понесенных убытков или возможных убытков, возникших в результате неисполнения обязательств Покупателем.

7 – Форс-мажорная ситуация

7.1. ПРОИЗВОДИТЕЛЬ не несет ответственности перед покупателем за любое нарушение договора, включая непоставку или несвоевременную доставку ТОВАРА, вызванные событиями, находящимися вне его контроля, например, недоставкой или задержкой доставки материалов от поставщиков, поломки оборудования, забастовок, стихийных бедствий, перебоев в подаче электроэнергии, приостановки или транспортных затруднений.

8 – Применимое законодательство – Компетентный Трибунал

8.1 Стороны соглашаются, что любые споры, касающиеся заключения, действительности, толкования или исполнения настоящего договора, подлежат исключительно юрисдикции судов по месту нахождения продавца, при этом прямо отказываясь от любой другой юрисдикции.

1 - Applicabilità delle condizioni

1.1. Le condizioni generali ivi riportate e specificate - di seguito denominate “CONDIZIONI” - formano parte integrante del contratto di compravendita di piastrelle e altri prodotti ceramici - di seguito denominati “PRODOTTO” o “PRODOTTI” - realizzati da Love Tiles - Gres Panaria Portugal, S.A., denominata anche “PRODUTTORE”.

1.2. Salvo casi specifici o eccezionali, in cui l’applicazione di queste condizioni è espressamente modificata per accordo scritto e firmato dal PRODUTTORE, esse rappresentano le condizioni esclusive applicate a tale vendita. Se una o più parti delle presenti CONDIZIONI o dei contratti, considerate singolarmente e di cui fanno parte, dovessero risultare in qualche modo nulle, invalide o inapplicabili per cause di forza maggiore, le CONDIZIONI generali o particolari rimarranno valide nella loro interezza e le condizioni invalide saranno sostituite da nuove disposizioni che riproducano, per quanto possibile, l’intenzione originaria delle parti.

1.3. Le vendite effettuate dalla nostra azienda sono disciplinate dalla Convenzione delle Nazioni Unite sui contratti di vendita internazionale di merci (CISG — Vienna, 1980). Le parti convengono che tutte le questioni relative alla formazione del contratto, alla sua esecuzione, alla mancanza di conformità, alle garanzie, alle responsabilità e ai diritti delle parti saranno interpretate in conformità alla CISG. L’acquirente si impegna a esaminare le merci e a notificare eventuali difetti di conformità nei termini previsti dagli articoli 38 e 39 della Convenzione, salvo diverso accordo contrattuale.

2 - Esecuzione del contratto di vendita - Consegna dei prodotti

2.1. Il contratto è concluso quando la parte offerente o l’acquirente è a conoscenza dell’accettazione scritta della controparte.

2.2. Un ordine non confermato per iscritto non può in nessun caso considerarsi accettato, a meno che non sia stato eseguito dal PRODUTTORE attraverso la spedizione o la consegna dei PRODOTTI. La consegna parziale dei PRODOTTI ordinati non implica l’accettazione dell’intero ordine, ma solo della parte dei PRODOTTI effettivamente consegnati.

2.3. Salvo quanto precedentemente ed espressamente concordato, la consegna dei PRODOTTI sarà effettuata esclusivamente nel territorio del Portogallo continentale e a condizione l’accesso di veicoli pesanti con semirimorchi di 24 (ventiquattro) tonnellate di peso lordo, sia possibile e consentito al luogo di consegna.

2.4. Se non espressamente concordato diversamente, tutte le date indicate per la consegna sono da considerarsi date approssimative.

3 - Caratteristiche dei prodotti - Garanzia - Reclami

3.1. I PRODOTTI realizzati da Love Tiles - Gres Panaria Portugal, S.A. sono realizzati in conformità alle norme europee applicabili. Il PRODUTTORE vende preferibilmente a rivenditori professionali, che hanno la responsabilità di fornire informazioni tecniche corrette e appropriate agli utenti finali o ai rivenditori.

La classificazione dei PRODOTTI è indicata dal PRODUTTORE nel materiale pubblicitario e/o nei listini prezzi. Di conseguenza, l’acquirente utilizzerà i PRODOTTI in conformità alle specifiche del PRODUTTORE.

Per facilitare il suggerimento d’uso e adattare la specifica standard alla specifica produzione del PRODUTTORE, su tutti i prodotti, listini prezzi o cataloghi sono presenti simboli specifici che indicano l’uso consigliato per ogni prodotto dal PRODUTTORE.

3.2. Eventuali differenze di tonalità o cromaticanza non sono dovute a difetti del PRODOTTO, ma sono una caratteristica specifica del materiale ceramico che è stato sottoposto a cottura ad alte temperature. La particolare caratteristica della “resistenza al congelamento” si applica solo ai prodotti che il PRODUTTORE ha espressamente garantito a tale scopo mediante un’espressa indicazione nel suo materiale pubblicitario e/o nei listini prezzi. In assenza di tale indicazione, i prodotti saranno considerati solo ed esclusivamente per uso interno o, comunque, per uso in luoghi non esposti ad elementi atmosferici che alterino le caratteristiche di resistenza o l’aspetto originale del PRODOTTO (ad es. precipitazioni atmosferiche, sole, umidità, basse temperature, ecc.)

3.3. Le piastrelle lucide possono cambiare il loro aspetto se utilizzate sul pavimento di ambienti che hanno accesso dall’esterno, o di ambienti soggetti a calpestio intenso. Le piastrelle lucide possono anche essere scivolose, soprattutto se bagnate o umide. Per questo motivo, il PRODUTTORE sconsiglia l’utilizzo di questi PRODOTTI in luoghi pubblici. Per gli ambienti soggetti a calpestio intenso, l’acquirente deve acquistare solo PRODOTTI classificati dal PRODUTTORE come “PEI V” o “Gres Porcellanato a Tatta Massa”, in particolare quei PRODOTTI che il PRODUTTORE raccomanda specificamente per l’uso in luoghi pubblici.

3.4. Le presentazioni dei PRODOTTI nelle brochure o in qualsiasi altro materiale promozionale del PRODUTTORE sono puramente illustrative e non rappresentano necessariamente il risultato estetico finale risultante dalla posa di questo specifico prodotto.

3.5. Il PRODUTTORE garantisce la buona qualità e l’assenza di difetti nei PRODOTTI forniti.

La garanzia non si applica ai PRODOTTI classificati dal PRODUTTORE come inferiori alla qualità di prima scelta, né alle scorte di prodotti fuori produzione, se venduti sfusi o indicati come lotti speciali.

Condizioni Generali di Vendita

3.6. Il PRODUTTORE non sarà responsabile di eventuali difetti e/o anomalie dei PRODOTTI che non derivino dalle specifiche tecniche dei PRODOTTI, ma che derivino piuttosto dall’uso improprio dei PRODOTTI da parte degli acquirenti e/o di terzi che agiscono per loro conto. In particolare, il PRODUTTORE non accetta reclami o controversie relative alle situazioni sopra descritte.

3.7. Le richieste di risarcimento per vizi di brevetto o per vizi occulti devono essere presentate per iscritto dall’acquirente al PRODUTTORE entro 60 giorni dalla data di consegna della merce. La responsabilità del produttore per i difetti inerenti alla merce consegnata al cliente è espressamente limitata a 2 anni dalla data di ricevimento della merce da parte del cliente.

3.8. In generale, la garanzia è valida solo per i difetti riscontrati sui prodotti che non sono ancora stati applicati. Per i difetti rilevati dopo l’applicazione del PRODOTTO, la garanzia può essere applicata solo se il PRODUTTORE ha confermato che la posa del PRODOTTO è stata eseguita a regola d’arte (DIN 18352), oltre che secondo le procedure descritte nel manuale di posa e manutenzione del PRODUTTORE.

3.9. La garanzia concessa dal PRODUTTORE è limitata alla sostituzione dei prodotti difettosi con altri prodotti dello stesso tipo senza difetti, più le spese di trasporto. È espressamente escluso il rimborso di eventuali altri costi e/o spese, in particolare le spese di demolizione e di trasloco. In ogni caso, la garanzia del PRODUTTORE non può superare il quintuplo del valore del materiale richiesto, fino ad un massimo di 10.000 euro.

3.10. Il PRODUTTORE non è responsabile di eventuali reclami dovuti ad una classificazione dei materiali ceramici effettuata da enti di certificazione e controllo diversi da quelli europei di cui all’art. 3.1 sulla base di specifiche tecniche che non corrispondono a quelle indicate dal PRODUTTORE. Qualsiasi analisi tecnica specialistica richiesta dall’acquirente si baserà sulla corrispondenza dei materiali venduti con le caratteristiche tecniche indicate dal PRODUTTORE, all’epoca in vigore in Portogallo.

4 - Prezzi e condizioni di pagamento

4.1. I prezzi di vendita dei PRODOTTI sono quelli indicati nel listino prezzi del PRODUTTORE in vigore alla data della conferma d’ordine. Per i contratti di vendita con consegne separate, il prezzo è quello indicato nel listino prezzi in vigore alla data di ciascuna delle consegne, a meno che le parti contraenti non abbiano scritto diversamente.

Per i PRODOTTI destinati ai mercati esteri il prezzo sarà calcolato, con indicazione del PRODUTTORE, nella valuta estera del paese di destinazione e in euro.

4.2. Se non espressamente concordato diversamente, i pagamenti devono essere effettuati tramite bonifico bancario entro 30 giorni dalla data della fattura. Tutte le spese bancarie e di bonifico sono a carico dell’Acquirente. In caso di ritardo nel pagamento, il PRODUTTORE avrà il diritto, senza preavviso all’acquirente, di applicare un tasso di interesse di mora e punitivo equivalente al tasso EURIBOR a 6 mesi maggiorato del 5%, fatto salvo il diritto al risarcimento di eventuali altre perdite.

5 – Agenti del Produttore

5.1. Gli agenti del PRODUTTORE promuovono la vendita dei PRODOTTI e non sono autorizzati ad agire in nome e per conto del PRODUTTORE, a meno che non ottengano un’espressa autorizzazione specifica in tal senso.

5.2. Gli ordini ricevuti dagli agenti non sono vincolanti per il PRODUTTORE e devono quindi essere espressamente accettati per iscritto dal PRODUTTORE stesso.

6 - Prenotazione di immobili

6.1. Le parti concordano che la vendita dei PRODOTTI verrà effettuata con riserva di proprietà da parte del PRODUTTORE fino al completo pagamento del prezzo concordato da parte dell’Acquirente. Tuttavia, il rischio di perdita della merce viene trasferito all’acquirente al momento della consegna dei PRODOTTI.

6.2. Nel caso di vendite all’estero, quando la merce viene venduta e consegnata a terzi nel normale corso della normale attività commerciale dell’Acquirente e la proprietà della merce non è ancora stata trasferita, la riserva di proprietà del PRODUTTORE rimane valida nei confronti del terzo.

6.3. In caso di ritardo nei pagamenti, il PRODUTTORE ha il diritto, senza alcuna formalità, compreso qualsiasi preavviso all’acquirente, di ritirare tutti i beni soggetti a riserva di proprietà e, se previsto dalla legge, tutti i titoli di credito di fronte a terzi, essendosi espressamente riservato il diritto del PRODUTTORE di utilizzare tutti i mezzi legali a sua disposizione al fine di recuperare i danni che ha subito o subirà a causa del comportamento inadempiente dell’acquirente.

7 - Caso di forza maggiore

7.1. Il PRODUTTORE non sarà responsabile nei confronti dell’acquirente per qualsiasi inadempimento contrattuale, compresa la mancata o ritardata consegna del PRODOTTO, causata da eventi al di fuori del suo controllo, come la mancata o ritardata consegna dei materiali da parte dei fornitori, guasti agli impianti, scioperi, forze della natura, interruzioni dell’alimentazione elettrica, sospensione o difficoltà di trasporto.

8 - Legge applicabile - Foro competente

8.1. Per la risoluzione di qualsiasi controversia derivante dalla presente vendita, le parti convengono che il foro competente, con esclusione di qualsiasi altro, è quello della sede del venditore.

Condiciones Generales de Venta

1 - Aplicabilidad de las Condiciones

1.1. Las condiciones generales enumeradas y especificadas a continuación –en adelante denominadas “CONDICIONES”-, constituyen parte integrante del contrato de compraventa de baldosas y de otros productos cerámicos – en adelante designados como el “PRODUCTO” o los “PRODUCTOS” - fabricados por Love Tiles - Gres Panaria Portugal, S.A., también designado como el “FABRICANTE”.

1.2. Salvo casos específicos o excepcionales, en los que la aplicación de estas condiciones sea expresamente alterada a través de un acuerdo por escrito y firmado por el FABRICANTE, las mismas representan las condiciones exclusivas aplicadas a esta venta. Si una o más partes de las presentes CONDICIONES o contratos, individualmente considerados y de los cuales formen parte, fuesen consideradas nulas, inválidas o inaplicables, por razones de fuerza mayor, las CONDICIONES generales o particulares permanecerán válidas en su conjunto, sustituyéndose las condiciones inválidas por nuevas disposiciones que reproducirán, lo mejor posible, la intención original de las partes.

1.3. Las ventas realizadas por nuestra empresa se rigen por la Convención de las Naciones Unidas sobre Contratos de Compraventa Internacional de Mercaderías (CISG — Viena, 1980). Las partes acuerdan que todas las cuestiones relativas a la formación del contrato, cumplimiento, falta de conformidad, garantías, responsabilidades y derechos de las partes serán interpretadas de acuerdo con la CISG. El comprador se compromete a examinar las mercancías y a notificar cualquier falta de conformidad dentro de los plazos previstos en los artículos 38 y 39 de la Convención, salvo estipulación contractual en contrario.

2 – Ejecución del Contrato de Venta - Entrega de los Productos

2.1. El contrato se celebra cuando la parte proponente o el comprador tenga conocimiento de la aceptación escrita del mismo por la contraparte.

2.2. Un pedido que no haya sido confirmado por escrito no podrá, en ningún caso, ser considerado como aceptado, a menos que haya sido ejecutado por el FABRICANTE mediante el envío o la entrega de los PRODUCTOS. La entrega parcial de los PRODUCTOS del pedido no implica la aceptación de la totalidad del pedido, sino tan solo la parte de los PRODUCTOS que efectivamente han sido entregados.

2.3. Salvo que se acuerde previa y expresamente lo contrario, la entrega de los PRODUCTOS se realizará exclusivamente en el territorio de Portugal continental y a condición de que sea posible y permitido el acceso de vehículos pesados con semirremolques de 24 (veinticuatro) toneladas de peso bruto al lugar de entrega.

2.4. Salvo acuerdo expreso en contrario, todas las fechas que se indiquen a efectos de entrega serán consideradas como fechas aproximadas.

3 - Características de los Productos - Garantía - Reclamaciones

3.1. Los PRODUCTOS fabricados por Love Tiles - Gres Panaria Portugal, S.A. se elaboran de acuerdo con las normas europeas aplicables. El FABRICANTE vende, de preferencia, a revendedores profesionales, que son responsables de prestar las informaciones técnicas correctas y adecuadas a los utilizadores finales o a los minoristas.

El FABRICANTE indicará la clasificación de los PRODUCTOS en el material publicitario y/o en las listas de precios. Así, el comprador deberá usar los PRODUCTOS conforme las especificaciones del FABRICANTE.

Para facilitar la sugerencia de utilización y adaptar la especificación estándar a la producción específica del FABRICANTE, existen, en todos los productos, listas de precios o catálogos, símbolos específicos que indican la utilización aconsejada para cada producto, por parte del FABRICANTE.

3.2. Las diferencias de tonalidad o crominancia que eventualmente puedan constar, no se deben a defectos del PRODUCTO, sino que es una característica específica del material cerámico que ha sido sometido a cocción, a altas temperaturas. La característica especial de “resistencia a la congelación” apenas se aplica a los productos garantizados como tales por el FABRICANTE, a través de una indicación expresada en su material publicitario y/o en las listas de precios. Cuando no exista esta indicación, los productos serán considerados única y exclusivamente para utilización en interior o, en cualquier caso, para ser utilizados en lugares que no se encuentren expuestos a los elementos atmosféricos que puedan alterar las características de resistencia o apariencia original del PRODUCTO (ej.: precipitación atmosférica, sol, humedad, bajas temperaturas, etc.).

3.3. Las baldosas de caras pulidas pueden sufrir alteraciones de aspecto cuando se utilicen como pavimento de estancias cuyo acceso se realice a partir del exterior, o estancias en las que se prevea una intensa circulación peatonal. Las baldosas pulidas también pueden resultar escurridizas, especialmente cuando están mojadas o por efecto de la humedad. Considerando este último aspecto, el FABRICANTE no recomienda utilizar estos PRODUCTOS en locales públicos. Para aquellos lugares con una circulación intensa de personas, el comprador apenas deberá adquirir PRODUCTOS clasificados por el FABRICANTE como “PEI V” o “Gres Porcelánico Todo Masa”, en particular los PRODUCTOS recomendados por el FABRICANTE específicamente para ser utilizados en lugares públicos.

3.4. Las presentaciones de los PRODUCTOS en folletos o en cualquier otro material promocional del FABRICANTE son meramente ilustrativos y, no tienen por qué representar el resultado final estético tras la instalación de ese producto específico.

3.5. El FABRICANTE garantiza la buena calidad y la ausencia de defectos en los PRODUCTOS suministrados.

La garantía no se aplica a los PRODUCTOS clasificados por el FABRICANTE como inferiores a los de 1ra calidad, o a los stocks de productos descontinuados, cuando se vendan a granel o estén indicados como lote especial.

3.6. El FABRICANTE no se responsabiliza por cualquier defectos y/o anomalías existentes en los PRODUCTOS que no resulten de las especificaciones técnicas de los mismos, sino que se deban a un uso inadecuado de los PRODUCTOS por parte de los adquirentes y/o de terceros que actúen en su nombre. En concreto, el FABRICANTE no acepta ninguna reclamación o litigio relacionada con las situaciones anteriormente descritas.

3.7. Las reclamaciones resultantes de la existencia de defectos patentes u ocultos tendrán que ser efectuadas por el comprador, por escrito, dirigidas al FABRICANTE, en un plazo de 60 días a partir de la fecha de entrega de las mercancías. La responsabilidad del Fabricante por defectos inherentes a los productos entregados al comprador queda expresamente limitada al plazo de 2 años a partir de la fecha de recepción de los bienes por parte del comprador.

3.8. En general, la garantía apenas se aplica a los defectos detectados en productos que aún no han sido aplicados. En relación a los defectos detectados tras la aplicación de los PRODUCTOS, la garantía apenas se podrá aplicar si el FABRICANTE hubiera confirmado que la instalación del PRODUCTO fue realizada de acuerdo con las mejores reglas de la actividad (DIN 18352), así como conforme a los procedimientos descritos en el manual de aplicación y mantenimiento del FABRICANTE.

3.9. La garantía concedida por el FABRICANTE se limita a la sustitución de los productos defectuosos por otros productos del mismo tipo, sin defecto, más gastos de transporte. Queda expresamente excluido el reembolso de cualquier otros costes y/o gastos, y en particular los costes con demoliciones y reinstalaciones. De cualquier manera, la garantía del FABRICANTE no podrá superar cinco veces el valor del material reclamado, hasta un valor máximo de 10.000 Euros.

3.10. El FABRICANTE no se responsabiliza de ninguna reclamación causada por una clasificación de materiales cerámicos efectuada por organismos de certificación y control diferentes de los europeos, indicados en el artículo 3.1, con base en especificaciones técnicas que no correspondan a las indicadas por el FABRICANTE. Cualquier eventual análisis técnico especializado, solicitado por el comprador se basará en la correspondencia de los materiales vendidos con las características técnicas indicadas por el FABRICANTE, vigentes en Portugal en ese momento.

4 – Precios y condiciones de pago

4.1. Los precios de venta de los PRODUCTOS están indicados en la lista de precios del FABRICANTE, vigente en la fecha de confirmación del pedido. Para contratos de venta con entregas separadas, el precio será el que conste en la lista de precios en vigor en la fecha de cada una de las entregas, excepto cuando las partes contratantes dispongan, por escrito, lo contrario.

Para los PRODUCTOS destinados a mercados extranjeros, el precio se calculará, por indicación del FABRICANTE, en la moneda extranjera del país de destino o en euros.

4.2. Excepto cuando se acuerde expresamente lo contrario, los pagos se efectuarán a través de transferencia bancaria, en un plazo de 30 días a partir de la fecha de la factura. Todos los gastos bancarios y de transferencias correrán por cuenta del comprador. En caso de atraso en la realización del pago, el FABRICANTE tendrá derecho, sin necesidad de previo aviso al comprador, a aplicar un tipo de interés de demora y sancionador equivalente al tipo EURIBOR a 6 meses más el 5%, sin perjuicio del derecho a indemnización por cualesquiera otros perjuicios.

5 - Agentes del Fabricante

5.1. Los agentes del FABRICANTE promueven la venta de los PRODUCTOS y no están autorizados a actuar en nombre y por cuenta del FABRICANTE, excepto cuando obtengan autorización específica expresa al efecto.

5.2. Los pedidos recibidos por los agentes no vinculan al FABRICANTE y, por lo tanto, deberán ser expresamente aceptados, por escrito, por el propio FABRICANTE.

6 – Reserva de Propiedad

6.1. Se acuerda entre las partes que la venta de los PRODUCTOS se efectuará con reserva de propiedad por parte del FABRICANTE, hasta que el pago integral del precio acordado haya sido completamente saldado por parte del comprador. No obstante, el riesgo de pérdida de las mercancías será transferido al comprador en el acto de la entrega de los PRODUCTOS.

6.2. En caso de ventas a países extranjeros, cuando las mercancías son vendidas y entregadas a terceros, en el ámbito de las actividades comerciales normales del Comprador y la propiedad de las mismas aún no haya sido transferida, el derecho de reserva de propiedad del FABRICANTE permanece válido ante terceros.

6.3. En caso de atraso en el pago, el FABRICANTE, sin necesidad de recurrir a cualquier formalidad, incluyendo cualquier aviso previo al comprador, tiene derecho a recoger todas las mercancías sujetas a reserva de propiedad y, si estuviera legalmente consagrado, todos los títulos de crédito ante terceros, quedando reservado expresamente el derecho del FABRICANTE de recurrir a todos los medios legales a su disposición para resarcirse de los perjuicios que haya sufrido o que llegue a sufrir como consecuencia de la conducta incumplidora del Comprador.

7 – Caso de fuerza mayor

7.1. El FABRICANTE no será responsable ante el comprador por cualquier incumplimiento del contrato, incluyendo la falta de entrega o el retraso en la entrega del PRODUCTO, causados por acontecimientos ajenos a su voluntad y que están fuera de su control, como por ejemplo, la no entrega o entrega con atraso de materiales por parte de proveedores, averías en las instalaciones, huelgas, fenómenos de la naturaleza, interrupciones en el suministro de la energía eléctrica, suspensión o dificultad en el transporte.

8 – Legislación aplicable - Fuero competente

8.1. Las partes acuerdan que cualquier litigio relativo a la formación, validez, interpretación o ejecución del presente contrato se someterá exclusivamente a la jurisdicción de los tribunales de la sede del vendedor, con renuncia expresa a cualquier otro fuero.
